Responsibility includes analysis of security events in customer environment to ensure that client IT infrastructure is secured. Key responsibilities include Incidents response, Incidents Handling and escalation management.

Professional Experience:

Nexplay Secure Pvt. Ltd.

Security Analyst L1

October 2023 – Till date | Ahmedabad

Responsibilities:

- Proactively monitored and analyzed security logs using **ElasticSearch** SIEM and **SentinelOne** EDR to detect and mitigate potential threats.
- Investigated and created cases for security threats, forwarding them to relevant teams for further action.
- Conducted thorough log analysis and addressed critical alerts promptly, maintaining a daily health checklist.
- Prepared tailored reports as per client requirements, developing a knowledge base and use cases to enhance security awareness.
- Analyzed logs from firewalls to identify suspicious activities and compile generic security incident reports.
- Conducted comprehensive root cause analyses of security incidents to uncover the origin of breaches and implement preventative measures.
- Investigated security alerts to identify vulnerabilities, recommending solutions to bolster overall system security.
- Actively monitored and responded to emerging cybersecurity threats, maintaining a proactive stance against potential risks.
- Ensured the deployment and integration of Elastic Agents within client environments.
- Oversaw the installation and management of the Fleet server for optimal performance.
- Managed the configuration of Elasticsearch, including setting up ingestion pipelines for log filtering and conducting other administrative tasks.
- Configured, maintained, and optimized a suite of security tools, including **Elasticsearch, Zeek, and Logstash**, to ensure robust security operations.
- Authored and disseminated security advisories to clients, ensuring their systems remained secure and up to date.

- Conducted analysis and installation of agents using **Datto RMM** for improved monitoring.
- Utilized **Jira** for generating and tracking tickets, ensuring timely follow-up until closure.
- Generated daily, weekly, and monthly reports on security incidents and performance metrics to track trends and improve response strategies.
