Software Engineer

Detail-oriented Data Analyst with over 2 years of experience in the IT and finance sectors, specifically at TCS and Finastra. Proven expertise in data analysis, statistical modeling, and data visualization. Successfully completed a project on data recovery in collaboration with IIT Madras, demonstrating strong analytical skills and a commitment to leveraging data for strategic decision-making.

WORK EXPERIENCE

Finastra • Pune • 08/2023 - 04/2024

Software Engineer

- Led initiatives to streamline reporting processes by automating data extraction and transformation workflows using SQL and Python, reducing report generation time by 35%.
- Conducted in-depth analyses of market trends and customer behaviors, presenting findings to senior management that influenced strategic planning and marketing campaigns.
- Managed master data sets and performed quality assurance checks to ensure accuracy and reliability of financial reports used for decision-making.
- Engaged with stakeholders across departments to gather requirements for new analytics projects, ensuring alignment with business objectives and timely delivery of insights.
- Developed predictive models for loan default risk assessment, contributing to the establishment of more effective lending policies that improved portfolio performance.
- Presented complex analytical findings in a clear and concise manner to non-technical stakeholders, enhancing understanding of data-driven insights across the organization.

Tata Consultancy Services Limited • Pune • 03/2022 - 07/2023

Software Engineer

- Analyzed transactional data to detect fraudulent activities, leveraging advanced analytics techniques to improve fraud detection rates by 30%.
- Created comprehensive reports detailing financial performance metrics that aided in identifying growth opportunities and potential risks within the investment portfolio.
- Collaborated with IT teams to enhance database systems for better data accessibility and reporting capabilities, resulting in a more efficient analytics environment.
- Implemented data visualization best practices that improved stakeholder engagement during presentations of analytical findings.
- Conducted training sessions for business users on new reporting tools and techniques, increasing overall data literacy within the organization.
- Participated in strategic planning meetings with senior leadership to align analytics initiatives with business goals, ensuring that data insights were effectively utilized.

SKILLS

Technical Skills: Excel, Power BI, Python, R, SQL, Tableau

Data Analysis: Data visualization, Predictive analytics, Statistical modeling

Soft Skills: Communication, Problem-solving, Team collaboration

EDUCATION

Bachelors Of Technology in Electronics And Communications Engineering

Oriental Institute Of Science And Technology
Bhopal

PROJECTS

Data Recovery Project

08/2021 - 03/2022

IIT Madras

- Led a project focused on the association of data recovery techniques, enhancing recovery rates by 50% through innovative algorithms.
- Collaborated with academic researchers to analyze large datasets, presenting findings at a national conference.
