Education

Lakshmi Narain College of Technology(Bhopal)

Nov 2021 – Present

B.Tech in Computer Science with specialization AI/ML

8.36 cgpa

Anuragh Narayan College Patna

2018 – 2020

Intermediate(PCM)

82.8 percent

Experience

Intern | SAA Consultancy

May 2024 – Sep 2024

Python Developer and Data Science Intern

Bhopal, MP

- **Data Science Role:** Employed Supervised Fine-Tuning (SFT) to generate numerous golden prompt-response pairs for training models. Utilized Reinforcement Learning from Human Feedback (RLHF) to enhance LLM outputs through feedback, comparisons, and rewrites. Tailored dataset generation methods (SFT or RLHF) based on customer requirements to optimize model performance and evaluation.
- **Python Developer Role:** Worked on an end-to-end LLM project using advanced technologies such as LLM models, Retrieval-Augmented Generation (RAG), vector databases, Llama 3, NLP, SQL, and Prompting.
- **Learning Outcomes:** Gained comprehensive insights into company workflows, project development from scratch, and practical data engineering applications.

Intern | Edunet Foundation

Feb 2024 – Apr 2024

Full Stack web developer

Remote

- Developed a voting website using Django as part of a 6-week internship in collaboration with AICTE.
- Recognized for exemplary achievement, securing a position among the top 37 projects of EY Global Delivery Services.
- Presented the project in front of an EY panel member.

Projects

NLP Projects | Python, Pandas, SpaCy, NLP Techniques [🔗](#)

May 2024

- **Named Entity Recognition (NER) in Cricket Domain:** Developed an NER model to identify and classify named entities in cricket-related text using GPT and prompting techniques for data gathering and creating the model using SpaCy v3.
- **Sentiment Analysis on Reviews Dataset:** Applied various NLP techniques including Stopwords removal, Tokenization, VADER sentiment analysis, and TF-IDF Vectorization to analyze and categorize sentiments in customer reviews.

Voting website | Fronted(HTML,CSS), Django [🔗](#)

Feb 2024

- Developed a voting website during an internship with Edunet Foundation in partnership with AICTE and EY.
- Created two sections: Election Poll and Public Poll, enhancing user engagement and participation.
- Identified areas for improvement, particularly in authentication, through feedback from EY panel members.

Book Recommendation system | Python, Machine Learning, Flask [🔗](#)

Sept 2022

- Developed a book recommendation system to help users discover new books based on their preferences. Designed system using Python, Pandas, HTML and CSS and Scikit-Learn, combining collaborative filtering .
- **Achievements:** Achieved 85percentage recommendation accuracy, enhancing user engagement and book discovery.

Technical Skills

Strong Area: Machine learning, Deep Learning, Statistics and Linear Algebra, Data Structure and Algorithm, LLM

Languages: Python, C++, HTML/CSS, SQL

Technologies/Frameworks: Django, Tensorflow, Keras, GitHub

Core Knowledge: DBMS, Object Oriented Programming, Natural Language Processing

Speaking Languages: English, Hindi

Certificates and Achievments

LeetCode (link) : I have solved more than 300 problems on LeetCode and have been consistent for the past six months.

Hackathon: I participated in the Smart India Hackathon 2023 as part of a team and achieved 6th position in the shortlisting phase.

Certificates: Python, TensorFlow, AWS Academy Cloud Foundation
