

Anshul Lanjewar

Software Developer with a passion for building high-performance and scalable mobile applications. Possesses strong skills in Java, Kotlin, and other programming languages, along with experience in automation tools and software development methodologies. Proven ability to collaborate effectively and independently to deliver projects.

EXPERIENCE

LEUMAS | Software Developer

Bangalore, India | September 2023 – Present

- Working with the **R&D** team to **design, develop, and maintain** software components for robotic systems.
- Developed an Android application from scratch to **automate** and monitor the entire robotic system. This app facilitates features like selection of processes and dynamic creation of Standard Operating Procedures (SOPs) for products via **BLE communication**.
- Improved robotic **position and movement efficiency by 15%** and increased **60% accuracy** in weight measurement system by implementing different optimization algorithms and libraries.
- Collaborated closely with hardware engineers to conduct system-level testing and **integrated algorithms**, troubleshoot issues, and resolve errors to meet project goals.
- Tech stacks – Android, Kotlin, C++, SQL, Firebase, Multithreading.**

SKILLS

Programming Languages	Java, Kotlin, C++, XML
IT Constructs	Data Structures and Algorithms, OOPs, SQL
Tools / Platforms	Android studio, GitHub, IntelliJ IDEA, Visual Studio Code, Unreal-Engine, Creo
Design Pattern & APIs	MVVM, MVP, Clean Architecture, Firebase, Room, Retrofit, OkHttp, GSON

PROJECTS

GUIDED | Link

Android, Java, Firebase

- Developed a **guidance app** for Android using **Java and Firebase** that enables users to find guidance from qualified individuals, post content, and **connect with other users**.
- Designed and implemented all key features, including search, **user authentication**, feed and posting functionality, **payment integration**, chatting, **video conference**, reviews like, and comments.

10 MIN WORKOUT | Link

Android, Kotlin

- Created an app to optimize workout efficiency through AI-driven exercise recommendations and progress tracking. The app uses the **OpenAI API** for personalized guidance and recommendation.

SUNSHINE | Link

Android, Java

- Developed a weather forecast app as part of the Udacity Developing Android Apps course. The app uses the **OpenWeatherMap API** to display weather forecast data for a **user-specified location**.
- Learned - Java, Android SDK, Android Studio, XML, SQLite, JSON, **REST API integration**, user interface design, data storage

EDUCATION

BHILAI INSTITUTE OF TECHNOLOGY

August 2019 - August 2023

Electrical and Electronics Engineering B.Tech Durg CGPA: 8.23

WORKS & AWARDS

- National Finalist, Herocolabs Game Development Challenge (2022).
- Published Paper, Envisioning the Future by Encountering Cables and Adopting Wireless, i-Manager (2023).
- 8th Rank, Metaverse – A new IT revolution, Epsilon Review paper (2022).
- Conducted Create-a-thon for AI-based filters, SPARK-AR and Student Association (2022).
- Reached 3 Rounds, SOLVEATHON, India.unisolve.org (2023).
