- E- Commerce
- Travel

CAREER SUMMARY

- Having good experience in creating scripts in Selenium Web Driver using Java.
- Experience in frameworks such as Cucumber, TestNG, Junit Data Driven and Rest Assured.
- Good experience in Page Object Model and Object-Oriented Programming Concepts.
- Experience in Web Services API Automation testing using Rest Assured.
- Experience to read and understand API documents.
- Performed Functionality testing, Regression testing and Sanity testing.
- Experience in developing test cases based on requirements in JIRA.
- Excellent experience with build tools like Maven and managing java automation projects.
- Maintained automation code and resources in source controls in GIT.
- Having good experience in SDLC and STLC.
- Having good experience in Agile Methodology using Scrum.

PROJECT SUMMARY

Client : ING Australia

Domain : Banking

Period of work : May 2024 to oct 2024

ROLES AND RESPONSIBILITY

- Collaborate with business analysts and developers to understand banking workflows and define test requirements.
- Design test strategies and prepare detailed test plans and test cases for functional, regression, security, and performance testing.
- Develop and execute automation scripts using Selenium and TestNG to validate end-to-end functionality and improve test efficiency.
- Test RESTful APIs and backend services using tools like Postman and Rest Assured to ensure accurate and secure data transactions.
- Validate the platform's compliance with financial security standards, testing for vulnerabilities such as unauthorized access and data breaches.
- Identify, log, and track bugs in defect management tools like JIRA, and collaborate with developers to resolve issues promptly.
- Validate the compatibility of digital platforms across various devices, browsers, and operating systems.
- Ensure adherence to Australian banking regulations and standards, performing tests for legal and operational compliance.
- Prepare detailed test reports, dashboards, and metrics to communicate testing progress and quality status to stakeholders.
- Actively participate in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, to align testing activities with project goals.

Client : Clicbrics

Domain : Real Estate

Period of work : Sep 2022 to Dec 2023

ROLES AND RESPONSIBILITY

- Analysis of user stories.
- Prepare test scenario and test data for user stories.
- Identify test scenarios which can be automated.
- Prepare test scripts using Selenium web driver.
- Execute and debug the test scripts.
- Raise and track the defects until closure.
- Reviewing the Test Reports and Preparing Test Summary Report.
- Showcase completed artifacts to the product owners by organizing demo sessions.
- Defects reporting and daily status report.
- Test case walkthrough before client and development team.
- Performed Regression Testing using Selenium Web Driver, Maven, TestNG.
- Designed Reusable, Maintainable & User Friendly Data Driven Framework.
- Requirement Analysis, Test Analysis and Test Estimation.
- Automation Test Scripts Creation.
- Test Case Creation and Test Case Execution.
- Reviewing Peer Test Cases and Test scripts.
- Reporting and Logging Defects in Jira.
- Preparation of Automation Script with in short deadline.
- Creating and Delivering Weekly Status Report to onsite.
- Co-ordination/attending calls with Onshore Counterpart, Business Stakeholders.

Client : Stylight

Domain : E - Commerce

Period of work : Feb 2020 to Sep 2022

ROLES AND RESPONSIBILITY

- Involved in Automation framework implementing Page objects, Data Driven, Maven using selenium Web Driver using Core Java.
- Prepare reusable methods to improve productivity and maintainability.
- Prepare Feature files and Step definition in Cucumber.
- Prepare POJO Classes to reduce memory wastage.
- Involved in Bug fixing for the defects raised in JIRA.
- Good Experience in Resolving conflicts and Involved in Push, Pull, Merge the source code from GIT.
- Perform Cross browser testing and parallel execution to check the compatibility and stability of the application.
- Extensively automated Regression test using Jenkins.
- Good in Java language programming and finding X-path locators.
- Validated the response, response time and error code.
- Validated the XML and JSON body by using JSON parsers.

Client : Kayak

Domain : Travel

Period of work : Sep 2018 to Jan 2020

ROLES AND RESPONSIBILITY

- Involved in Test Plan, design and deriving test data and creating and reviewing peers test cases.
- Executed the test cases.
- After test case execution, Bugs are raised in JIRA.
- Preparing Defect Report and assigning the defects to developer to fix the defect.
- Retesting the cases where defect has been raised and update the status.
- Send Daily Report to Project Manager. Performing functional testing on the critical modules.
- Prepare weekly status reports.
