SENIOR QA ENGINEER (Immediate Joiner)

CAREER OBJECTIVE

Detail-oriented Senior QA Engineer with over 8+ years of experience in software quality assurance, focusing on manual testing and process improvement.

AREAS OF EXPERTISE

I am part of a 5-member QA team, where I manage task assignments to ensure product quality. I resolve issues using analysis and debugging techniques and take ownership of my work to consistently deliver high-quality results.

EDUCATIONAL HISTORY

UPTU

B.Tech in Computer Science & Engineering
Year 2010-2014

C-DAC, Hyderabad

PG-DAC
Duration: Feb 2018- August 2018

PROFESSIONAL SKILLS

- Mobile testing, API Testing using POSTMAN, SQL, Black-box Testing
- Admin website testing
- Cross devices testing using Android Studio
- Defect tracking tool - Jira, Mantis
- Database tools- DataGrip, SequelPro for DB testing
- Tools- POSTMAN, Jenkins, TestNG, Basics of Maven
- OS- Mac, Windows, and Linux
- Others - Charles, DynamoDB, AWS Cloudwatch

WORK EXPERIENCE

Senior QA Engineer | Bijak | Dec 2021 - Oct 2024

- Led QA team, collaborating with cross-functional teams to ensure alignment on project and product requirements.
- Developed test plans for web applications and managed manual testing processes.
- Oversaw manual testing for web and mobile applications, executing test cases and documenting results.
- Worked closely with developers to troubleshoot issues and improve product quality.
- Actively participated in daily stand-ups and sprint planning within an Agile framework.
- Provided UAT support, including defect analysis, retesting, and regression testing.
- Validated data using SQL queries to verify test outcomes.
- Conducted API testing for end-to-end test coverage.
- Led multiple projects (Bijak, LMS, TMS, Account Statement, Just-Procurement, Lot Management, Automated Sticker Printing), ensuring successful delivery and quality outcomes.

QA Engineer-I | Meesho | Aug 2019 - Nov 2021

- Tested mobile-based applications manually and also having the experience of
- Provided UAT support for defect analysis, retesting, and execution of regression test cases.
- Performed API testing to complete end-to-end testing.
- Validated data using SQL queries to verify test outcomes.
- Collaborated closely with developers and product managers to understand requirements and ensure testability.

QA Engineer | Trackdefect | Mar 2019 - Aug 2019

- Performed mobile-based testing for a healthcare app.
- Logged defects, conducted retesting, and performed analysis and reporting.
- Analyzed existing use cases to design test cases.

QA Engineer | Handygo Technologies | Feb 2017 - Jan 2018

- Functional Testing has been done and maintained Test Cases on Test Link
- CRM Testing used in Selenium

QA Engineer | Limetray | Dec 2015 - Jan 2017

- Performed compatibility testing on browsers and mobile apps (iOS and Android).
- Ensured module quality by identifying issues and facilitating fixes before deployment to production.

QA Engineer | Clarion Technologies Pvt. Ltd. | Oct 2014 - Nov 2015

- Conducted manual testing of Android and iOS applications.
- Created test cases.
- Logged bugs using Jira to track them for retesting.

LATEST PROJECTS BRIEF

BIJAK | Lot Management System

Tested the Procurement and Warehouse modules, facilitating vendor creation and stock maintenance. Implemented lot number generation from vendor stocks in the warehouse, which are utilized through orders placed via Just B2B apps. Conducted daily stock counts and quality grading for warehouse products.

BIJAK | Automated Sticker Printing

Streamlined warehouse operations by testing a feature to automate sticker printing for SKUs, reducing average manual effort from 3 hours to a more efficient process. This feature uses configurable parameters, such as pricing (special or normal), unit sale price, expiry date, and packaging date, etc. to generate accurate labels.

BIJAK | TMS + LMS + Buyer Dashboard

We developed and tested a Trade Management System (TMS) for grains trading, which now includes a Loan Management System (LMS). Buyers can use their Grains Credit Account to pay for products, creating loans that incur TDS and TCS based on loan type, along with late charges. Once the loan is repaid by the buyer, the operations team marks it as settled. All relevant data is accessible to buyers through a Buyer Dashboard.

PAST PROJECTS BRIEF

MEESHO

Revamped the Meesho app, concentrating on the challenges module for reward point updates. Contributed to various modules, including the in-house event system and referral program. Managed feature branches, deployed to the QA server using Jenkins, and adjusted server configuration settings via commands.

TRACKDFECT | DocsApp (which is the part of Medibuddy now)

Contributed to the DocsApp, part of MediBuddy now, focusing on the medicines and lab categories. Developed functionality to automatically fetch prescribed medicines for users and facilitate lab test bookings from prescriptions. Additionally, captured non-deliverable area pin codes to address delivery challenges in those regions.

HANDYGO TECHNOLOGIES | AstroLive

At Handygo Technologies, I contributed to the AstroLive application, allowing users to connect with real astrologers in real-time. Users purchase minute packages for interactions, which include end-to-end chat during video calls. Astrologers are categorized by specialty, making it easy for customers to find the right expert for their needs.
