E-mail : jothiarul259@gmail.com

PROFILE SUMMARY

- Software Professional 4+ years of experience in Application development with sound knowledge in Oracle SQL, PL/SQL, PYTHON, SSRS, APEX.
- Having strong hands-on experience on database object creation and enhancement based on CR's.
- Having experience in change management.
- Excellent SQL skills, experience writing complex queries and working with database objects like Analytical functions, Joins, Views, Materialized View, Sequence and Constraints.
- Created and Customized DB objects such as Procedures, Functions, Packages, Triggers, Indexes.
- Extensively used Cursors, Exception handling of both type of the Pre-defined and user defined.
- Developed and maintained dynamic websites using HTML, CSS, PHP, and MySQL.
- Utilized Oracle APEX to create and manage interactive reports, interactive grids, classic reports, and forms.
- Experienced in requirement analysis, coding, debugging and unit testing
- Various modules in a software development life cycle (SDLC).
- Used Python to fetch data from the T&R tool and generate a report in Excel format.

ACADEMIC PROFILE

- Computer Science and Engineering (2018) at Christian College of Engineering and Technology in Dindigul.

TECHNICAL SKILL SET

- | | | |
|---------------------------------|---|-----------------------------|
| • Operating environments | : | Windows Family |
| • Programming Languages | : | PL/SQL, SQL, SSRS. |
| • Databases | : | Oracle. |
| • Tools Used | : | SQL Developer, JIRA, GitHub |
| • Reporting Tools | : | SSRS, APEX |

Professional Experience:

Software Engineer – Cyient Limited.

Project 3 – FordDAT3

- Gather and analyze the business requirements of new change request and enhancement from client.
- Created package with validation procedures during data porting from stage table to actual table.
- Having experience in creating Impact Analysis Document for prod/UAT issues.
- Created detail design document as per change request.
- Also having experience in impact analysis document creation for each CR point.
- Involved in production issues which requires code fix.
- Participated in database tuning and application debugging.
- Also having experience in unit testing for new changes in development environment.

Software Engineer – Chola mandalam Investment and Finance Pvt Ltd.

Project 2– Vehicle Finance.

- Designed and developed database schema, tables, views, and constraints to support application development.
- Implemented data migration and ETL processes using PL/SQL and SQL scripts.
- Created complex SSRS reports to meet the reporting needs of various departments.
- Developed and maintained SSRS reports, ensuring data accuracy and timely delivery.
- Developed complex PL/SQL procedure to handle errors and exceptions at database level.
- Using apex build applications that interact with Oracle Database, such as data entry forms , data visualization dashboards, and reporting tools.

Software Engineer – Tamil Info Technology.

Project 1– My Vision.

- Developed and maintained dynamic websites using HTML, CSS, PHP, and MySQL.
- Implemented responsive web design to ensure cross-platform compatibility.
- Collaborated with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Optimized website performance, ensuring fast load times and improving SEO.
- Managed version control using Git for project collaboration and code management.
- Created and optimized database schemas and queries for MySQL.
- Worked with senior developers to implement new features and fix bugs.
- Conducted testing and debugging of web applications to ensure functionality.
