

|| Technical Program Manager ||

Extensive experience in managing complex programs and projects, driving cross-functional teams, and ensuring the timely delivery of high-quality solutions. Seeking an opportunity to lead strategic initiatives, optimize resource utilization, and implement process improvements while aligning project goals with organizational objectives to achieve operational excellence and business growth.

PROFILE SUMMARY

- **Accomplished professional** with **over 15 years** of experience in **end-to-end Program & Project Management with notable success** in managing a broad range of **Software Delivery Programs** for Sustaining and NPD while participating in strategic project/program planning & implementation of Healthcare, Medical Devices, Pharmaceuticals, Energy/power and Banking(core/Investment) domains.
- **Defining service standards & guidelines**, governance structure, best practices that worked as benchmarking for excellent service delivery with P&L management.
- Seasoned expert in **SaMD**, specializing in **radiation modalities and AI/ML models** for optimizing healthcare workflows.
- Top-performer with excellent track record of delivering **high quality services** to support customer's business needs and achieving continuous high customer satisfaction from all operational users for services.
- Proven track record of **maintaining key project KPIs**, proactively addressing and mitigating potential issues with stakeholders and senior management.
- **Forward-focused TPM** with exposure in swiftly completing projects with competent cross-functional skills and ensuring on-time deliverables within pre-set cost parameters.
- **Architected technical solutions** required to address customer requirements, assessed customers' needs and recommended solutions that optimized value for both the customer and the firm.
- **People Leader** with proven success in leading high-performance of **40+ team members** towards accomplishment of common goals and managing multiple stakeholders across leadership & engagements.

CORE COMPETENCIES

- | | | |
|--|---|---|
|  <i>Program & Project Management</i> |  <i>Continuous Improvement</i> |  <i>Budget and Resource Management</i> |
|  <i>Delivery Management</i> |  <i>Client Relationship Management</i> |  <i>Cross-functional Collaboration</i> |
|  <i>Agile/Scrum Methodologies</i> |  <i>Requirement Gathering & Analysis</i> |  <i>People Management</i> |

KNOWLEDGE DOMAIN

- ❖ Agile/SAFe/Scrum/V-Model
- ❖ Scaled Agile
- ❖ FDA 510K Regulatory Submission Process
- ❖ ISO/IEC Standards.
- ❖ AAMI TIR45:2023 & V&V with CFR 21

Healthcare Platform Expertise:

- ❖ Led R&D initiatives for Philips Intellispace Discovery, AI in Radiology, and PACS for Radiology modalities.
- ❖ Collaborated with Siemens Healthineers, focusing on Ultrasound modality.
- ❖ In-depth knowledge of healthcare standards including HIPAA, HL7, DICOM, and FHIR.
- ❖ Experience with US healthcare Payer domain and EHR/EMR.

TECHNICAL SKILLS

- ❖ **Project Management Tools:** MS Project, Smartsheet, Gantt, MS Excel
- ❖ **Database:** SQL, Oracle, MySQL
- ❖ **People Management:** Skill Matrix, RACI
- ❖ **QA:** Jira, TFS, Bugzilla, HP QC, DOORS
- ❖ **Virtualization:** VMWare, Virtual box,
- ❖ **Atlassian:** Confluence, Big bucket, Trello
- ❖ **PML:** Siemens TcU, Windchill, TrackWise, SAP
- ❖ **SCA:** Blackduck, FOSSA

EDUCATION

- ❖ **Bachelor in Information Science and Engineering (B.E.)** from MS Ramaiah Institute of Technology, Bangalore.

WORK EXPERIENCE

Aug'22-Present: Baxter International as Technical Project/Program Manager for Infusion pumps & Renal devices.

Key Result Areas:

- Collaborating with stakeholders to forecast and strategically reduced project costs by approximately 15% through efficient budgeting and resource allocation optimization.
- Enhancing team efficiency by implementing Agile methodology, leading to significant improvements over the previous approach. Conducted PI meetings to align teams and ensure seamless execution.
- Navigating FDA quality system regulations, ISO 13485, MDD/MDR, and successfully managed MDSAP audits in collaboration with the team, ensuring compliance with stringent industry standards.
- Managing the financial planning for the Software R&D team, aligning AOP and budget to support project goals and resource needs.
- Engaging in strategic discussions with the marketing team to identify and define new features for existing medical products, enhancing product offerings.
- Developing new strategies for the product development team, ensuring global software releases in strict adherence to regulatory approvals, while coordinating with regulatory and quality teams for FDA/Health Canada updates.
- Expertise in design controls for medical devices, collaborating with the product design owner during input and final design reviews to ensure product readiness for launch.
- Administering the development, verification, validation, risk management, regulatory compliance, and cybersecurity for medical device management, ensuring full compliance with regulatory standards.
- Identifying failure modes and worked with risk engineers to develop and implement effective mitigation strategies.
- Demonstrating strong stakeholder management capabilities, providing regular updates on project progress and performance managing SOW across IT, business, and vendor relations while consistently acquiring client feedback and taking corrective actions as needed.
- Leading, mentoring, and coaching a team of 40 resources; managing programs & performed analysis, thereby developing feature set and built SOPs.
- Providing strategic direction and contributing to the overall growth and success of programs within the organization.
- Leading the successful execution of large-scale programs, ensuring alignment with organizational goals, timelines, and budget constraints while managing multiple cross-functional teams.
- Driving continuous process improvements and best practices, focusing on efficiency, quality, and risk reduction, ensuring that project delivery methodologies are consistently followed.
- Developing and tracking key performance indicators (KPIs) for program and project performance, providing regular updates and comprehensive reports to senior management and stakeholders.
- Overseeing client/vendor relationships, ensuring deliverables meet expectations, and managing contract negotiations, escalations, and service-level agreements (SLAs).

May'18-Jul'22: Philips Healthcare, Bengaluru Project Management/RTE

Key Result Areas:

- Led and managed the end-to-end operations across the software development and testing lifecycle, overseeing release planning (POC, RFD, service packs), requirement analysis, test design, execution, defect management, and reporting.
- Collaborated with hospital clinical teams and marketing teams to identify and prioritize new features for integration into the existing product, ensuring alignment with market and clinical needs.
- Developed POCs for cross-functional teams, focusing on fielded MRI machines and emerging Research NPDs, ensuring alignment with technical and business objectives.
- Played an integral role in the product development lifecycle for MRI and AI/ML solutions, from ideation through to product launch, ensuring seamless execution and delivery.
- Provided comprehensive project management support, including change management, risk and issue management, status tracking, and project reporting to keep stakeholders informed and aligned.
- Defined and led the implementation of project management strategies, methodologies, standards, and tools to ensure successful project delivery while ensuring clear communication of responsibilities to the team.
- Formulated budgets and drove project planning efforts, managing scope, estimation, resource coordination, and timely delivery according to defined SLAs.
- Managed the software quality process, including the review of product functions, test specifications, defect prevention strategies, metrics collection, and team leadership to ensure high-quality outputs.
- Coordinated closely with developers, addressed technical challenges and bugs, and supported the resolution of issues to maintain project progress and product quality.

PREVIOUS COMPANIES:

- **May'17-Feb'18: Siemens Healthcare, Bengaluru as Associate Consultant**
- **Dec'14-Nov'16 and May'18-Jun'22: Philips Healthcare, Bengaluru**
- **Apr'13-Dec'14: Sepit Soft Tech Pvt. Ltd., Bengaluru as Technical Consultant and Maveric Systems**
- **Jan'12-Mar'13: Enzen Global Solutions, Bengaluru as Software Engineer**
- **Jul'09-Nov'11: Tejas System, Bengaluru as Software Engineer**
