

Ashirwad Gurav

Student at KLS Gogte Institute Of Technology

To work in an organization where I can use my skills to achieve the organization objective and at the same time enhance my knowledge and hence be a stepping stone in my quest for quality and excellence.

EDUCATION

Bachelor of Engineering

KLS Gogte Institute of Technology

08/2020 - 06/2024

CGPA 8.09

Course

– Electronics and Communication

Pre-University

KLE GI Bagewadi PU College

06/2018 - 03/2020

91.6%

Course

– Science

Primary and High School

KLE Society's English Medium CBSE School

06/2005 - 03/2018

82.6%

PERSONAL PROJECTS

IoT Based Water quality Monitoring System And Arsenic Detection

- Developed an **IoT-based water quality monitoring system and predicting arsenic presence**. Integrated real-time **sensors** to measure certain parameters. Also used a **photo** colorimeter for absorbance measurements, feeding data into a Machine Learning algorithm to predict **arsenic** contamination.

Automation of Incubator for Core Making in Foundry

- Revolutionizing foundry operations, our project **automates** the **core-making process** within incubators, enhancing efficiency and precision in metal casting.

Automatic Emergency Braking System

- Designed and implemented an innovative **Automatic Emergency Braking System** using Arduino **UNO R3**, enabling real-time detection of potential collisions and prompt activation of brakes and warnings, **enhancing vehicle safety**.

Fire Fighting Robot

- Developed a **state-of-the-art firefighting robot**, integrating **advanced fire flame sensor (LDR)** technology with an efficient water tank and spray mechanism. Utilized Arduino Uno for real-time data processing and swift response to oncoming fires, successfully **mitigating potential hazards**.

INTERNSHIP

Intern

Future Technology

10/2022 - 11/2022

Belgaum

Join the team as an Embedded IoT **Intern** and immerse myself into the cutting-edge world of **Internet of Things (IoT)** technology. Throughout this internship, I worked closely with experienced engineers to design, develop, and test embedded systems for IoT applications. I had the opportunity to gain hands-on experience in **hardware and software development and sensor integration**.
