WORK EXPERIENCE

Dolcera

Software Developer

October 2022 – Present

Hyderabad

Technologies Used: Python, Flask, PostgreSQL, Redis, Celery, OpenAI APIs, Docker, Kubernetes, Grafana, JWT, Microservices Architecture

- Designed and implemented a microservices-based backend for an AI-driven patent analysis platform, handling over **5000 requests daily** using **Python, Flask, PostgreSQL, and Redis**.
- Automated patent drafting and research workflows using **OpenAI APIs**, reducing task completion time from **3-4 days** to **15-30 minutes**.
- Optimized asynchronous task management with **Redis and Celery**, decreasing task failure rates by **25%**, and implemented scalable deployments via **Docker and Kubernetes** ensuring **99.99% uptime**.
- Enhanced monitoring and issue resolution using **Grafana** and **Prometheus**, reducing response times by **60%**.

UnDosTres [Certificate]

Software Developer

May 2022 – September 2022

Remote

Technologies Used: Java, Spring Boot, PostgreSQL, AWS, Docker, RESTful APIs

- Developed and deployed **RESTful APIs** using **Spring Boot** for a payment gateway processing over **1M+ transactions monthly**, increasing success rates by **20%** with improved error handling.
- Automated deployments using **AWS (ECS, EC2, S3)** and **Docker**, reducing deployment times by **40%** and minimizing downtime.
- Optimized **PostgreSQL** queries to eliminate bottlenecks, reducing API response times by **25%** and enhancing scalability during peak loads.

UnDosTres [Certificate]

Software Developer Intern

February 2022 – April 2022

Remote

Technologies Used: Java, Spring Boot, Google OAuth

- Implemented secure **Google OAuth 2.0** for admin login, increasing adoption by **15%**, and streamlined **Spring Boot** services, reducing API response times by **25%**.
- Assisted in marketing campaigns with backend support, improving customer segmentation and boosting campaign conversion rates by **20%**.

EDUCATION

Jadavpur University

Bachelor of Engineering

2018 – 2022

8.09/10

SKILLS

Languages:	Python, Java, C/C++, SQL, Javascript
Frameworks:	Flask, Spring Boot, Django, ReactJs
Cloud/Database:	PostgreSQL, Redis, DynamoDB, AWS (S3, EC2, ECS, CloudFront)
Tools/Technologies:	Celery, Docker, Kafka, Grafana, Kubernetes, RabbitMQ
Others:	Microservices Architecture, RESTful APIs, JWT, DBMS, Low-Level Design

ROLES AND ACHIEVEMENTS

- Achieved **AIR 1160 (99.2 percentile)** in WBJEE among 150,000 candidates [[Certificate](#)].
- Advanced to **Round 2** of **Meta Hacker Cup 2024** (Rank: **2791**, **Round 1** and **3636**, **Round 2**) and secured **4324 rank** in Google Kickstart Round C [[Meta Certificate](#), [Kickstart Certificate](#)].
- Solved **590+ problems** on [Codeforces](#) (rating: **1060**, max: **1249**) and **1040+ problems** on [LeetCode](#) (rating: **1840**, max: **1877**).
