PROJECTS

E-COMMERCE WEBSITE : Developed an E-commerce Web Application Courier page where users can track the packages they have sent from the courier office. It is a third -party application with user and admin login, where the admin can make the details and parcel the user's courier and users can track their couriers with the help of the tracking id given by the Courier office.

Front-end : HTML, CSS, JavaScript, JQuery, Ajax, Bootstrap.

Back -end : SQL, PHP.

COURIER WEBSITE: It is a third party courier web-based application using technology such as HTML, CSS, SQL. Developing the site for the company with the admin facility and customer to track their orders and place the orders. Different Courier(Startupfloor.in).

BOOKSTORE WEBSITE: The Bookstore Application is a user-friendly platform offering a curated selection of books for purchase online. Users can explore featured books, educational resources, and contact support easily. The application also provides convenient sign-up and login functionality for personalized experiences and secure access to account features. Used Technologies :-

MongoDB :- It's a NoSQL DB.

ExpressJs :- It's a Node Js Framework (Backend)

ReactJS :- It's a JavaScript Library (Frontend) UI Design :- TailwindCss

SOCIAL DISTANCING DETECTION : The contagion is spreading snappily and is a peril to the mortal race. [COVID -19]. To produce a save girding we proposed a system with an effective computer vision grounded on real-time monitoring which is suitable to descry social distancing in public places through camera grounded on SSD object discovery technology. Social distancing discovery using SSD(Single Shot MultiBox Sensor) is a computer vision fashion for detecting social distancing violations in real- time.
