EXPERIENCE

Full Stack Developer (.NET Developer)

Agilsys Software Labs Pvt. Ltd.

October 2023 – Present, Panjab

- Proficient in C#, .NET, MVC, Angular, and Microsoft SQL Server, building scalable, high-performance applications.
- Skilled in server-side logic, RESTful APIs, and front-end development with Angular for seamless integration and user-friendly interfaces.
- Strong collaboration and problem-solving skills, ensuring timely project delivery and alignment with business needs.

PROJECTS

RPT (Report Generation Tool)

Agilsys Software Labs Pvt Ltd • May 2024 – Present

- Developed a dynamic reporting tool that aggregates data from multiple applications, delivering actionable insights for business decisions.
- Engineered a reporting module for the Employee Management application, tracking key metrics like hiring trends, separations, average tenure, and monthly hiring rates.
- Built custom reports for Playbook, enabling the creation and analysis of questionnaires, checklists, and interactive media elements to enhance user engagement.
- Designed a user-friendly interface, ensuring seamless navigation and data visualization across diverse report types.
- Implemented secure data processing and storage protocols, ensuring compliance and protecting sensitive information across various applications.
- Automated the report generation process, reducing manual data handling, improving accuracy, and saving valuable time for end-users.

MCAPatform

Agilsys Software Labs Pvt Ltd • January 2024 – May 2024

- Developed a loan management system connecting syndicates (investors) and merchants, facilitating seamless loan processing and distribution.
- Enabled efficient capital flow by managing funds from syndicates and providing loans to merchants for business growth.
- Designed a scalable backend C#, ASP.NET, MVC and intuitive UI/UX with Angular, optimizing platform usability and performance.
- Integrated real-time analytics and reporting tools, providing valuable insights to stakeholders and improving decision-making processes.
- Automated loan workflows and approval processes, reducing manual interventions and improving overall efficiency.
