PROFESSIONAL EXPERIENCE

Test Analyst

5.5 years of experience in Manual and Automation Test with Core Java, Selenium WebDriver, Xpath, API, Rest Assured, Data Driven, HPE Server/OS, Virtualization & Storage Testing.

I am Currently working with a FedEx Client in the logistics domain, focusing on Web UI & API Testing

INFOSYS PVT LTD.

MARCH 2022- Till Now

MPHASIS PVT LTD.

JAN 2019-Feb 2022

TECHNICAL SKILLS & COMPETENCIES

Software Testing	HPE Server, Storage & Web UI and API Testing Experience in System, Regression, Sanity and Functional Testing
Domains and Applications experience	Retail, Logistics and HPE Server & Storage Testing (Driver, Firmware and Product Testing),
Retail Concept	E-commerce and Logistics (API and UI) Testing
Test Automation Tools and Frameworks	Selenium Web Driver, Xpath, TestNG, BDD Cucumber, Data Driven, API, Rest Assured, Maven
Programming Languages & DBMS	Basic Python, Core Java and Oracle/PostgreSQL
Storage Concept	RAID levels, HDD/SSD qualification and DAS, SAN (FC, iSCSI)
Operating Systems	Linux (RHEL 7.x,8.x SLES 12.x,15.x), Windows server (2012, 2016,2019,2022) & ESXi (6.5,6.7,7.0)
Other Tools/Technologies	Smart Storage Administrator, Putty, WinSCP, FileZilla, HJ-Split, HP ALM, QuIX, JIRA, Agility Version one, GIT & Insomnia

EXPERIENCE & SUMMARY

INFOSYS PVT.LTD [Mar 2022 – Till Now]

Project 1

ALSHAYA: OMS Automation and Functional Testing

- Identify the functional scenarios and prepare test cases to Automate
- Maven using Selenium Web Driver with **Core Java**.
- Good in Java language programming and finding **X-path** locators
- Involved in Automation Infrastructure Development using Selenium.
- Worked on Test cases using Java programming features and **TestNG** Annotations.
- Involved in Automation framework implementing **Page Objects Model & Data Driven**
- Designing & Developing of Test Strategies, Test Plan, Test Cases and Test Reports for API testing using Java Cucumber Rest Assured Framework.
- Worked in the Agile/scrum development environment with frequently changing requirement and features

Project 2

FedEx: Linehaul [Rocs Maintenance UI and API Testing]

- Played a key role in sprint rollout, scrum calls, daily standup
- Requirement Analysis: Understanding the requirement, communicating with BA team for better understanding of the requirement Writing effective and optimized test cases.
- Worked on **API** Testing by **Insomnia** for multiple services.
- Execution of test cases in **Agility Version tool**
- Extracting the defects and identifying the Open, Retested, Fixed and New defects.
- Identification of defects, registering them in Agility and reporting them to onsite lead.
- Performed **Functional** testing, **Regression** testing and Re-testing.
- Performed smoke, sanity testing and device compatibility testing.
- Identified **End To End** test scenarios.
- Tools used – **Agility (version one)** and **Insomnia**

MPHASIS PVT.LTD [Jan 2019 – Feb 2022]

Project- HPE Server, Controllers and OS Testing Domain

- Good Experience in creating the test bed setup with HPE Servers (**DL, ML, Blade and Synergy Servers**),HPE Smart Array Controllers, Smart HBA Controllers and HPE Storage Boxes hardware.
- Having good experience on validation of storage Controller\Network adapter firmware, driver, Storage technology
- Having good Experience in debugging HPE Server, Controller, and Network adapters Hardware.
- Experience in Preparing Test plans for new projects.
- Experience in **System, Regression, Sanity and Functional Testing**.
- Have Good knowledge of **RAID** Technology.
- Experience in testing **SSD** and **HDD** drives.
- Experience in working with **Linux, Windows** and **ESXi** OS. **And experience in creating virtual machines.**
- Good knowledge on **Selenium** with **Core JAVA**
- Good knowledge on **Cucumber BDD Framework with Selenium**
- Good knowledge on Software testing concepts. Preparing Test Plans, Test Cases, Test Bed Setup, Issues Reporting in JIRA and interacting with the developers to root cause the defect.
- Experience in Logging defect in **QUIX** and interacting with the developers to root cause the defect.
- Sound Knowledge on **DAS** technology and **SAN** technology (FC, iSCSI).
- Experience in structuring the test cases in **HP ALM** and TC run.
- Signature Check for NIC cards (**4820,6810,5330 & 4610**) family.

ACADEMIC QUALIFICATIONS

- Bachelor of Engineering in Computer Science, Indore Institute of Science & Technology (IIST), Indore, M.P. (Aug 2014– May 2018) **Scored- 71.20%**
- Class 12th from Kisan H/S Madardih, Gaya, Bihar. (2013 – 2014) **Scored - 65.4%**
- Class 10th from J L N Memo Sr. Sec. School Dhanbad, JH. (2010 – 2011) -**CGPA: 7.6**

ACHIEVEMENT & CERTIFICATIONS

- Completed training on “Python Basics S1” Certification by Mphasis.
- Got “Mphasis summit award” for efficient coordination with Onsite team in delivering the product.
- Got “Mphasis Apex Award” for efficient coordination with Offshore team in delivering the product.
- Got “Infosys Insta Award” for delivered good project to client on exact time.

I hereby declare that the above-mentioned details are true and complete to the best of my knowledge.
