Total Experience: 4 Years

Previous Company: A&S

Brokerage

Technical Skills: SQL Server 2019/2017/2016/2014/2012/2008/R2/2005, Always-On, Performance Tuning and Optimization, migration, Clustering, Mirroring, Replication, ServiceNow, SolarWinds, SSIS, SSRS and SSAS, Amazon Web Services (AWS) Operating Systems: Linux/Unix, Windows Server 2003/2008/2012/R2/2016/2019

SKILLS

- 4 years of experience as a SQL Server database administrator.
- Performance Tuning and Optimization (PTO), experience in writing SQL queries to retrieve, insert, and update data.
- SQL Server Development (Query Optimizations, Writing Stored Procedures)
- Designs and implements disaster recovery solutions for database systems.
- Knowledge of automated methods and best practices for installation and configuration of PostgreSQL
- Expert in Windows clustering and SQL Server Cluster, High Availability (HA) /Disaster Recovery (DR)
- SQL Server database patching and Windows Servers (Service packs, hotfixes and patches)
- HADR using Replication, Log Shipping, Database Mirroring, Clustering, Always-On
- SQL Server integration, reporting and analysis services (SSIS, SSRS and SSAS).
- SQL documentation, Capacity Planning and Management, Change and Release Management process (ITIL Processes)
- Experience in deploying Windows and Linux using Terraform as a code with PowerShell to configure the database environment.
- Backups restores, recovery models, database shrink operations, DBCC commands
- Experience in Virtualization technologies (VMWare, Hyper-V), Windows Active Directory, Linux and Windows
- Networking and communication protocols including WANs, LANs, VPN, protocols such as TCP/IP and their impact on IS

EXPERIENCE

A&S Brokerage

September 2019-
Present

Database Engineer

Worked on SQL Server Replication, Log Shipping, Mirroring, AlwaysOn, Clustering and Backup/Recovery.

Work closely with the Application Architecture and Development teams to ensure the consistency and integrity of database development.

Detect and troubleshoot SQL Server related CPU, memory, I/O, disk space and other resource contention. Administering SQL Server High Availability and Disaster Recovery strategies.

Performance Tuning, Query Optimization, Performance Monitor, SQL Profiler and other monitoring and troubleshooting tools.

Deployment of T-SQL scripts by creating and running the batch file on multiple databases.

Worked on multiple DR tests including third party DR test and native DR technologies.

Assist developers with query tuning and schema refinement

Provide 24x7 support for critical production systems

Perform scheduled maintenance and support release deployment activities after hours

EDUCATION

Bangalore University

Bachelor's Computer Applications

2018
