SUMMARY

Certified and motivated AWS Cloud Engineer with a solid academic foundation in computer science (BSc, MSc) and robust hands-on experience in architecting, deploying, and managing AWS infrastructure solutions. Skilled in optimizing AWS environments to achieve performance, cost-efficiency, and security, I bring technical expertise across core AWS services like EC2, S3, Lambda, VPC, and RDS. I am now seeking a junior to mid-level cloud engineering role where I can expand my impact by applying advanced skills in automation, Infrastructure as Code (IaC), and serverless computing to build scalable, resilient AWS-based solutions that drive business value.

EXPERIENCE

- Chikbit Global Services Pty Ltd** October 2023 - Present
AWS Cloud Engineer Melbourne, Australia (Remote)
 - AWS Monitoring:** Monitored EC2, S3, RDS, and Lambda using CloudWatch for proactive issue detection.
 - Support and Troubleshooting:** Provided Level 1/2 support for AWS-based applications and resolved issues.
 - Collaboration:** Worked with DevOps teams to optimize infrastructure and rollout solutions.
- Educba** January 2024 - August 2024
Assistant Technical SME/Editor Mumbai, Maharashtra (On-site)
 - Blog Creation & Technical Writing:** Developed technical blogs on Data Science, Software Development, and Linux systems, providing in-depth content to readers.
 - Course Development & Collaboration:** Transitioned to creating online courses on AWS, Microsoft Azure, and AI/ML for Udemy, working closely with experts to design high-quality, learner-focused content.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate** November 2024
- AWS Certified Cloud Practitioner** October 2024

EDUCATION

- Ramniranjan Jhunjhunwala College** 2022 - 2024
Masters of Computer Science Mumbai, India
 - CGPA: 8.67/10
- Kirti M. Doongursee College** 2019 - 2022
Bachelor of Computer Science Mumbai, India
 - CGPI: 8.78/10

KEY PERSONAL PROJECTS

- Cloud Resume Challenge** [GH]
Tools: HTML, CSS, JavaScript, AWS (S3, CloudFront, DynamoDB, API Gateway, Lambda), Terraform, GitHub Actions
 - Developed a personal resume website hosted on AWS S3 with CloudFront for HTTPS, incorporating a visitor counter powered by JavaScript and a serverless backend with AWS DynamoDB, API Gateway, and Lambda in Python.
- Serverless Data Processing on AWS – Real-time Data Analytics and Storage Solution** [GH]
Tools: AWS Lambda, Kinesis, S3, DynamoDB, Athena, Cognito
 - Built a scalable, serverless pipeline on AWS to process and analyze real-time streaming data. Utilized AWS Lambda for event-driven processing, Amazon Kinesis for data ingestion, S3 for storage, and DynamoDB for NoSQL data management.

SKILLS

- Cloud Platform** Amazon Web Services
- DevOps & CI/CD:** Jenkins, Ansible, Git (GitHub, GitLab), Jira
- Infrastructure as Code (IaC):** Terraform, CloudFormation
- Database Management:** MySQL, PostgreSQL
- Monitoring/Observability:** Grafana, Prometheus
- Programming & Scripting:** Python, JavaScript, Bash, Go
- Containerization & Orchestration:** Docker, Docker Compose, Kubernetes, Helm
- Networking concepts,** Virtualization, NGINX, SSH
- Operating Systems:** Linux, Windows
