Project Description:**Project#1:****Banking Process Automation:**

Client : Kredo Bank.
Duration : Apr 2018 to 2022
Role : .net Developer
Software : ASP

Brief overview of the Project

Kredo bank is the Ukraine based bank with the largest Polish investment in banking institution in Ukraine. Kredobank national network contains central branch and 130 outlets throughout Ukraine. Today, European investment is 99.6% in the share capital of Kredobank, Ukrainian capital is 0.4%. KREDOBANK is a member of the Association of Ukrainian banks, Ukrainian credit and banking union, First stock trading System, Kyiv interbank currency exchange. Also, Kredo bank is a member of such international payment systems, as Master card worldwide , Visa International and the Deposit Guarantee Fund.

Roles and Responsibilities

- Web and Windows based application automation.
- Exception handling and Problem solving.
- Analyzing the problems and implement the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Using TFS Release management for automating deployment process.
- Business Logic implementation / coding as per the design specifications.
- Split the requirements and check the feasibility of the projects with automations.
- Designing workflow and prepare scripts to automate functional requirements
- Interact with clients to get the detailed workflow and clarification clearance
- Involved in User Interface Design as per Client specifications.
- Involved in unit testing and Bug Fixes.

Project#2:

Client : Jamii Bora Bank.
Duration : Apr 2017 to Jan 2018
Role : .net Developer
Software : ASP

Brief overview of the Project

The bank was founded, as a Charitable Trust, by fifty destitute families on the streets of Nairobi, Kenya's capital and largest city. In March 2010, it merged with another financial institution with a banking license and transformed into a fully fledged commercial bank.

In March 2010, Jamii Bora merged with City Finance Bank (CFB), a small private financial services provider which, in the past, had provided services to large corporations and high-net-worth

individuals. In the merger, CFB acquired JBB and took on the name of its new acquisition. Other investors in the bank include Baraka Africa Fund (BAF), and other individual investors

Roles and Responsibilities:

- Web and Windows based application automation.
- Exception handling and Problem solving.
- Analyzing the problems and implement the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Using TFS Release management for automating deployment process.
- Business Logic implementation/coding as per the design specifications.
- Involved in User Interface Design as per Client specifications.
- Involved in unit testing and Bug Fixes.

Project#3:

Swift Robotics - Dell Order Processing

Client : Sonata software.

Duration : Nov 2016 to Mar 2017

Technologies: Full Stack Web Development

Brief overview of the Project:

Swift Robotics Platform is to automate the Order Processing along with Automation Anywhere automation tool which will help the client to reduce the operation costs, increase in quality, control and the much needed process standardization. This BRD will focus on new shifting rule to make the sifting between regions similar to the shifting within same region in terms of the process, charges, and configuration. Second scope is on Robotic development which would consume and respond to data which would be consumed by the Robots to do the necessary actions in the Order processing

Roles and Responsibilities:

- Extensive involvement in Robotic Process Automation development process by using Automation Anywhere
- Web, Windows and Mainframe based application automation.
- Exception handling and Problem solving.

- Analyzing the problems and implement the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Work with BAs to understand stakeholder and functional requirements
- Work with BA to design To Be solution and create Solution document
- As a part of Quality Assurance team for all the project, involved in Initial testing, User Acceptance Testing (U.A.T) & Deployment of live environment.
- Review the failure & exception cases and fix the bug at immediate manner and send back the RCA.

ANDROID PROJECT:

PREVIOUS EXPERIENCE

Worked as a Android Application Development .

Translate designs and wireframes into high quality code

- Design, build, and maintain high performance, reusable, and reliable Java code
- Ensure the best possible performance, quality, and responsiveness of the application
- Identify and correct bottlenecks and fix bugs
- Help maintain code quality, organization, and automatization
- Strong knowledge of Android SDK, different versions of Android, and how to deal with different screen sizes
- Familiarity with RESTful APIs to connect Android applications to back-end services
- Strong knowledge of Android UI design principles, patterns, and best practices
- Experience with offline storage, threading, and performance tuning
- Ability to design applications around natural user interfaces, such as “touch”
- Familiarity with the use of additional sensors, such as gyroscopes and accelerometers
- Knowledge of the open-source Android ecosystem and the libraries available for common tasks
- Ability to understand business requirements and translate them into technical requirements
- Familiarity with cloud message APIs and push notifications
- A knack for benchmarking and optimization
- Understanding of Google’s Android design principles and interface guidelines
- Proficient understanding of code versioning tools, such as Git
