PROFESSIONAL SUMMARY

Blockchain developer with 4 years of experience. Currently managing private blockchain network and blockchain service(API Integration). Specialization in Hyperledger fabric 1.4&2.3 deployment in docker and kubernetes. Also played various roles like Software tester and Project coordinator in previous experiences. Completed internship in Kerala Blockchain Academy, Trivandrum and certified in Ethereum, Hyperledger as well as fullstack developer.

TECHNICAL SKILLS

- * **Programming Languages/Scripts** - Java, Go, Node.js
- * **Web Technologies** - HTML, CSS, JavaScript
- * **Web/Application Servers** - Apache Tomcat, Nginx Web Server
- * **Blockchain** - Hyperledger fabric 1.4 2.3 & Ethereum
- * **Consensus** - POW, POA & RAFT
- * **Databases** - MySQL
- * **IDE** - Visual Studio Code, NetBeans
- * **Cloud Platforms** - AWS
- * **Containers and Orchestration** - Docker & Kubernetes.
- * **Code Repository/Version ctrl** - GitHub & SVN
- * **Operating Systems** - Ubuntu & Windows.

EXPERIENCES

Organization	EDEXA , Ahmedabad
Designation	Blockchain Developer
Duration	December 2022 – Till date

Primary Duty: Manage private blockchain network and , blockchain service(API Integration)

Responsibilities

- **Blockchain Development:** Design, develop, and deploy private blockchain networks
- **Smart Contract Development:** Write and deploy smart contracts to automate business processes and facilitate secure transactions within the blockchain network.
- **API Integration:** Integrate blockchain functionality into existing applications or build new applications with blockchain capabilities.
- **Research and Innovation:** Stay up-to-date with emerging blockchain technologies and explore their potential applications to propose innovative solutions.

Work Experience

- Implemented a private blockchain in a Kubernetes cluster using the Bevel tool.
- Developed and deployed client applications and chaincode on the Hyperledger Fabric blockchain.
- Created and integrated a block explorer for real-time blockchain data visualization.
- Resolved Docker issues during the upgrade of the Kubernetes cluster to version 1.29, ensuring seamless performance.

Achievements

- Best Performer Award in 2023

Organization	SecureKloud Technologies, Chennai
Designation	Blockchain Developer
Duration	July 2020 – December 2022
Primary Duty	Developing Blockedge Product (Blockchain Infra product)

Responsibilities

- Automate, optimize, and execute process improvements on existing loads. Provide analysis, Perform system/architectural design, project planning, and coding.
- Having strong knowledge in Hyperledger, Ethereum, Docker, Kubernetes and AWS
- Collaborated with colleagues from other department and participated in the creation & testing of new applications

CERTIFICATIONS ACHIEVED

- Certified Blockchain Architect (ongoing), Kerala Blockchain Academy
- Certified Ethereum Developer (CED), Kerala Blockchain Academy id- ABCD/KBA/0701010/CED/19
- Certified Hyperledger Developer (CHD), Kerala Blockchain Academy id- ABCD/KBA/1202014
- Certified Blockchain Associate (CBA), Kerala Blockchain Academy id- ABCD/KBA/1202010
- Full-Stack Developer, ICT Academy of Kerala & K-DISC

EDUCATION

Pursuing MCA from Lal Bahadur Shastri College of Engineering, Kasaragod (2015 - 2018)

Graduated in BSc Mathematics with Statistics from Kozhikode Government Arts and Science College (2012 - 2015)

MY WORKS

1. **PDS System** [Application built on Hyperledger Sawtooth that maintains a distributed ledger in a private, decentralized platform.]

link: <https://gitlab.com/aswathashii/pds>

2. **Vehicle Management System (BLOCKCHAIN TECHNOLOGY)** [This system consists of a speed sensing mechanism which automatically records the data into the blockchain, maintained by the Traffic Police, with the details of the over speeding vehicle using the GSM technology]
