TECHNICAL SKILLS

- ❖ Programming Languages
 - Dart
 - Java
 - C#
 - React.js
- ❖ IDE
 - Android Studio
 - VS Code
 - X Code
 - Azure Studio Code
- ❖ Framework
 - Flutter
 - Spring Boot
- ❖ Database
 - Oracle
 - Ms SQL
- ❖ Others
 - WhatsApp Chat Banking System (created and implemented)
 - Webhook Integration for Real-time Communication

PROFESSIONAL EXPERIENCE

Software Developer – Banking at **Finonyx Software Solutions Pvt Ltd – Bangalore**
From **July 2023 to Present**.

Flutter Developer at **JobShop - Bangalore**
From **February 2023 to June 2023**.

Software Developer at **Corpfield Technology Pvt Ltd – Nagercoil**
From **December 2020 to February 2023**.

WORK SUMMARY

- Designing and developing apps for Android, IOS (Flutter Tech).
- Experience in Java Spring Boot for backend API creation.
- Utilized Node.js to integrate Meta APIs and REST APIs into applications, focusing on design and development for WhatsApp chat banking functionalities.
- Implemented REST services in the backend server using Java Spring Boot to retrieve required HTTP resources. Proficient in creating robust and scalable backend solutions, ensuring seamless communication with the front-end.
- Developed and maintained RESTful APIs, incorporating best practices for design, security, and performance.
- Development of Android/IOS applications and have Published them on both Google Play/App Store.
- Knowledge of Dart programming language, Rest APIs, and integration of various APIs from third parties.
- Design and build sophisticated and highly scalable apps using Flutter.
- Build custom packages in Flutter using the functionalities and APIs already available in native Android and IOS.
- Developed and maintained dynamic web applications using React, improving user interface and overall performance.
- Proficient in building single-page applications (SPAs) using React, including components, services, routing, and state management
- Experienced in using TypeScript with React for type-safe and maintainable code.
- Proficient in building reusable components, managing states with hooks, and working with React Router for navigation.
- Analyzing the issues and fixing the bugs
- Following new trends in Design & Development.
- Follow the best practices while developing the app and keeping everything structured and well documented.
- Manage the code and project on Git/SVN to keep in sync with other team members and managers.
- Deployed APIs on the WebLogic server.
- Consulting with our customer facing representatives about software system design and maintenance.
- Perform time profiling and memory leaks assessment.
- In learning phase of Object-Oriented programming language C# for API Creation.

KEY PROJECTS

- Hawra (Celebrity Application) – Oman
- Bajuwala – India
