CAREER OBJECTIVE

An experienced professional in Backend Development transitioning to **DEVOPS** and want to be associated with a progressive organization that can provide me a dynamic work sphere, challenging assignments with responsibility which encourages creativity and keeps in touch with the latest technologies in **CI/CD**, cloud services and have an urge and inclination for learning new technologies, a strong work ethic combined with a commitment to excellence in all projects undertaken

PROFESSIONAL SYNOPSIS

- Good Knowledge in Azure cloud services such as **Virtual Machines (VMs)**, **Virtual Network (VNet)**, **Azure Files**, **Blob Storage**, **Azure Active Directory (AAD)**, Azure Monitor, Azure Activity Log, and Azure Notification Hubs. Proficient in managing Azure VMs, including creating multiple instances, configuring network security groups, creating snapshots and custom images, and attaching managed disks, among other tasks.
 - Good understanding of **SDLC lifecycle** and **AGILE Methodology**.
 - Have good knowledge of **Azure Blob Storage** and **Azure Storage** lifecycle management. Worked on configuring blob versioning, static website hosting, and other related tasks. Created **Virtual Networks (VNETs)**, worked with various components of VNETs, and utilized Network Watcher to analyze traffic and monitor VNet flow logs. Used Azure Monitor for application log monitoring as well as CPU utilization tracking. Created Azure Active Directory (AAD) Roles, Custom Policies, and applied those roles and policies to multiple Azure services and users.
 - Have good knowledge of Windows OS and **Linux** OS and Have good knowledge in **shell scripting**. Worked with **Ansible** for Configuration Management and Created Ansible Playbooks, Roles and Handlers. Worked with Ansible Vault and Loops too.
 - Good Knowledge of **SCM** with **Git**, and **GIT-HUB**, created multiple branches, tags, pull requests and etc. Very Good understanding of Maven and its Commands and Have good knowledge of Apache Tomcat 9 and Apache httpd servers.
 - Worked with **Jenkins** for **CI/CD** and Have good experience with Jenkins installation, permissions, credentials, plugin and tool configuration. Worked with **Docker** and **Docker-Compose**.
 - Good communication and adaptive to various processes.
-

PROFESSIONAL EXPERIENCE

Exceleur Services Private Limited
Backend Engineer

Mar 2024 - Present

PROJECTS PROFILE

Project Name : Movix

Domain : Entertainment

The project aims to help users search and discover movies effortlessly. Users can explore movie details, including cast, ratings, and reviews, across various categories. The goal is to create a user-friendly web application for a seamless movie discovery experience.

Project Name : Backup to Azure Blob Storage

Domain : Automation

Set up a cron job to automate backups of files to Azure Blob Storage. The cron job runs at specified intervals, uploading backup files to a designated blob container. This ensures regular, reliable backups with easy access and storage management in the cloud.

TECHNICAL SKILLS

- Operating Systems : Ubuntu Linux and Windows
- Cloud Services : Virtual Machines (VMs), Virtual Network (VNet), Azure Files, Azure Blob Storage, Azure Notification Hubs, Azure Database for MySQL, Azure Active Directory (AAD).
- Monitoring Cloud : Azure Monitor and Azure Activity Log.
- DevOps Tools : Git, GitHub, Apache Maven, Jenkins, Docker, Ansible.
- Scripting Language : Shell Scripting, Groovy Sandbox, Yaml.
- Servers : NGINX.
- Database : Azure Database for MySQL.
- Frameworks : Nodejs, Laravel, React.
- Programming Language : Basics of Python, php, Javascript.
- Ticketing Tool : Jira.
- Advance DevOps Tools : Terraform and Kubernetes.

EDUCATIONAL QUALIFICATION

Bachelor's Of Computer Science (Btech)

B.N College of Engineering and Technology

2018 - 2022
