PROFILE

I am a full-stack software developer with 2 years and 4 months of experience, skilled in designing and building scalable, high-performance applications across various technologies. My expertise spans both frontend and backend development, allowing me to deliver comprehensive, end-to-end solutions that meet project goals and enhance business outcomes. I am adaptable to new tech stacks and committed to continuous learning, enabling me to effectively contribute to any technical environment.

PROFESSIONAL EXPERIENCE

Software Developer

Framsikt AS

08/2022 – present
Bangalore, India

- **AI Integration:** Integrated the OpenAI ChatGPT model with a microfrontend architecture to enable AI-driven interactions, improving user engagement and enhancing functionality across various applications.
- **Micro-Frontend Development:** Developed a micro-frontend architecture from scratch, enabling CI/CD processes using Domain-Driven Design principles to improve scalability, maintainability, and deployment efficiency. Contributed to the agile transformation of the organization.
- **Common Components Library** : Developed and published an Angular 17 and Kendo UI components library as an npm package, now used across applications to reduce UI development time by 70%.
- **Project Leadership & Delivery:** Led a complex project(data-sync) for a key client, focusing on core features, quality, and meeting deadlines. Increased project profitability through strategic and hands-on management.
- **Application Modernization:** Managed modules in a critical API overhaul, transitioning from .NET Framework to .NET 6 and jQuery to Angular 14. Enhanced performance by over 95% through updated coding standards and design patterns, improving scalability and system reliability.

Software Developer Intern

Nucleus Software

11/2021 – 02/2022
Noida, India

- **Bank Management System:** Built a comprehensive management system for a banking client using PL/SQL, Java, and Spring Boot, streamlining operations and improving data handling efficiency.

EDUCATION

B.Tech

Dr. A.P.J. Abdul Kalam Technical University

2018 – 07/2022
Lucknow, India

SKILLS

C#		Entity Framework	
.Net		Angular	
TypeScript/JavaScript		SQL	
Kendo UI			

PROJECTS

Attendance using face recognition

2022 – 2022

Academic project in 8th semester

Language : Python

- Developed an attendance system using Python, leveraging facial recognition to automate attendance tracking. Utilized major libraries like NumPy and OpenCV to ensure accurate and efficient image processing.
