CAREER OBJECTIVE

To obtain a challenging position in Information Security where I can prove my ability, skills, creativity & leadership to prove to be an asset to the organization and get valuable experience to excel in my career and to enhance my professional skills and to serve my organization in a best possible way with determination and commitment.

PROFESSIONAL SUMMARY

- Having total **3.7 years** of experience in Information Security and currently working as Security Analyst (Security Operation Center team).
- Experience on SIEM (Security Information and Event Management) tools like monitoring real-time events using Q-radar, Splunk, Azure sentinel.
- Preparing daily, weekly and monthly report as per client requirement.
- Experience in Monitoring & Investigating the incoming Events in the DLP(Data Loss Prevention).
- Investigating and creating case for the security threats and forwarding it to Onsite SOC team for further investigation and action.
- Experience in Monitoring & Investigating the incoming Events in the MacAfee.
- Good Knowledge on OSI Models, Protocols, security concepts, WAN and LAN concepts, Routing protocols, Firewall security policies, VPN.
- IDS/IPS - CheckPoint, HP Tipping Point, Check Point IPS.
- Having excellent knowledge of Intrusion Detection (deep TCP/IP knowledge, and Cyber security), various operating systems (Windows/UNIX), and web technologies (focusing on Internet security).
- Having ability to read and understand packet level data Intrusion detection and prevention and Network Security Products (IDS/IPS, firewalls, etc.) Host Security Products (HIPS, AV, scanners, etc.).
- Experience on performing log analysis and analyzing the crucial alerts at immediate basis through SIEM.
- Handling critical alerts from Symantec Endpoint Protection and working for resolution.
- Handling alerts from Crowdstrike EDR and investigation.
- Correlating the incoming events by creating rules based on specific set of conditions and logical operations.
- Identify malicious URL's and suspicious IP's from IDS events generated and also block the malicious website on proxies to prevent future download of the virus.
- Analysis of virus alerts triggered by the Symantec (SEPM) and provides the remediation steps.
- SEP health analysis and reporting the outdated workstations to update the virus definitions.

- Phishing and Spam Email analysis through Ticketing tool live time.
- Preparing Vulnerability Assessment reports and remediation steps post assessment using Tenable Nessus and Qualys Guard.
- Having knowledge on vulnerability management.
- Exposure to Ticketing tool like Service Now.
- Strong knowledge on Incident management life cycle.
- Good communication, problem solving skills and the ability to acquire new skills in a timely manner.

TECHNICAL SKILLS

- ♦ SIEM: Splunk, Qradar, Azure sentinel.
- ♦ EDR: CrowdStrike, Carbon black.
- ♦ DLP (Data Loss Prevention)
- ♦ Symantec, McAfee.
- ♦ Phishing and Spam Email Analysis
- ♦ Vulnerability Assessments and remediation
- ♦ Anti-virus/End point Management
- ♦ System Monitoring.
- ♦ Trend Micro Deep security ,Qualys ,Nessus.
- ♦ System Security and IT Systems Monitoring OSINT Sand-boxing

EXPERIENCE

Feb 2021 – Till Date

MINDTREE (Bang)

SIEM (SOC ANALYST) - SECURITY OPERATIONS | INFORMATION SECURITY

- Working in Security Operation Center (24x7), monitoring of SOC events, detecting and preventing the Intrusion attempts.
- Good understanding of security solutions like Firewalls (Palo Alto, checkpoint, Fortinet) DLP(Data Loss Prevention) , Anti-virus, IPS, Email Security etc.
- Responding to various security alerts for various client and scanning for vulnerabilities using tools like Qualys.
- Monitoring real-time events using SEIM tools like Qradar, Arcsight.
- Handling Alerts from multiple Security Log sources such as Proxy, Anti-Virus and EDR.
- Experience in Monitoring & Investigating the incoming Events in the MacAfee.
- Experience in Monitoring & Investigating the incoming Events in the DLP(Data Loss Prevention).
- Deep dive Investigation through Falcon EDR.
- Monitoring, analyzing and responding to infrastructure threats and vulnerabilities.
- Phishing and Spam Email Analysis.
- Investigate the security logs, mitigation strategies and responsible for preparing generic security incident reports.
- Having excellent knowledge of Intrusion Detection (deep TCP/IP knowledge, and Cyber security), various operating systems (Windows/UNIX), and web technologies (focusing on Internet security).

- Responsible to preparing the Root Cause Analysis (RCA) reports based on the analysis.
- Analyzing daily, weekly and monthly reports.
- Creating case for the suspicious issue and forwarding it to Onsite SOC team for further investigation.
- Website Anti-Malware and Defacement monitoring and real-time alerting based on anomalies detected.
- Act as first level support for all Security Issues.
- Monitor SIEM alerts, analyze events in SIEM and raise Security incidents in Ticketing tool Manage Engine.
- Monitoring security systems and networks for anomalies.
- Handling Alerts from multiple Security Log sources such as Proxy, Anti-Virus and EDR.
- Deep dive Investigation through Falcon EDR.
- Investigating security violations, attempts to gain unauthorized access, virus infections, etc.
- Coordinate responses to security incidents in a timely manner.
- Work with various teams across the organization to improve security posture.

EDUCATION

MBA from Rajiv Gandhi institute of management sciences in 2020.

DECLARATION

I Here declare that the above given information is correct to the best of my knowledge and belief.
