SUMMARY

Experienced Cloud and DevOps Engineer with expertise in AWS service management, CI/CD pipeline optimization, and cloud automation. Skilled in Docker, Kubernetes, and cloud architecture, with a proven track record in cross-functional collaboration and incident resolution. Known for driving continuous improvement to enhance deployment and operational efficiency. Excited to join your growth journey and confident I can add significant value with my expertise.

EDUCATION

St Ann's Boys Higher Secondary School

Higher Secondary 2016 – 2018
Percentage - 47

Vel Tech High Tech Dr.Rangarajan Dr.Sakunthala Engineering College

B.E Computer science and engineering 2018 – 2022
GPA - 7.70

SKILLS

- AWS service management
- AWS -EC2, S3, RDS, EKS, etc....
- Linux
- Continuous integration and Continuous delivery(CICD).
- Script writing - (yaml, shell)
- python
- Cloud computing,
- cloud Server maintenance
- Cloud Automation
- cloud networking
- Cloud architecture
- Cloud repository maintain
- GIT, GitHub, GitHub Action
- Container
- Docker , DockerHub
- kubernetes
- Cloud security management
- AWS Organization billing

AWARDS

- buddy tech award sep 2023
- Alpha of the week oct 2024

PROFESSIONAL EXPERIENCE

Junior DevOps engineer

Alphind software solution oct 2022 - mar 2024

Associate DevOps Engineer

Alphind Helthcare Apr 2024 - present

Experience :

- CI/CD Pipeline Management: Designed and maintained automated CI/CD pipelines, optimizing build, test, and deployment workflows.
- Cross-Team Collaboration: Partnered with development, QA, and operations teams for streamlined deployments, APK hosting, and automation of deployments.
- Cloud Infrastructure: Managed AWS environments, including EC2, S3, Elastic Beanstalk, Route 53, VPC, CloudFront, WAF, API Gateways, and VPN, ensuring security, compliance, and reliability.
- Containerization & Orchestration: Leveraged Docker and Kubernetes for efficient application containerization and orchestration.
- Server Maintenance: Performed maintenance and troubleshooting on Windows and Linux servers, supporting secure and reliable infrastructure.
- Cloud Monitoring & Billing: Used CloudWatch for monitoring; managed AWS billing across the organization to optimize cost efficiency.
- Security & Compliance: Implemented best practices in security, SSL certificates, NGINX configurations, and IAM roles to maintain industry compliance standards.
- Incident & Root Cause Analysis: Addressed production issues through timely troubleshooting and root cause analysis to enhance system reliability.
- Continuous Improvement: Actively identified and executed process improvements using tools like SonarQube, improving code quality and deployment efficiency.
- Response & Maintenance: Ensured timely responses and maintenance for all cloud resources and services, including API gateways and WAF configurations.
-

PROJECTS

- **Xealei** - Fall detection Health maintaining IOT product
- **Revolei** - Patient Health electronic record management
- **MCO** - service Sandhills Insurance claim maintenance
- **A2X** - Insurance claim maintenance
