OBJECTIVE

Passionate and motivated fresher seeking opportunities to kick-start a successful career. Eager to apply my academic knowledge, strong work ethic, and enthusiasm to contribute to a dynamic organization.

PROFILE SUMMARY

- Good knowledge of Build and Release Pipeline for CICD Deployment
- Expertise in implementing of Continuous Integration, Continuous Delivery, Continuous Deployment.
- Configuration Management: Maintenance of source code Repository using Git, Branching, Tagging and Merging.
- DevOps process with technologies and platforms including Git, Maven and Jenkins.
- Knowledge and certified in Version Control Systems administering like GIT.
- Knowledge in Build tools like Maven.
- Extensive Knowledge in installation and configuration Tomcat server.
- Knowledgeable about CI/CD integration tools like Jenkins.
- Implemented Docker based Continuous Integration and Deployment framework.
- AWS Cloud platform and its features which includes EC2, VPC, ECS, S3, ELB.
- Deployment Models: Public Cloud, Private Cloud, Hybrid Cloud
- Service Models: IAAS, PAAS, SAAS.
- AWS Global Infrastructure: Regions, Availability Zone.
- Basic Network technologies: HTTP, HTML, DNS, TCP/IP, etc.,.
- Knowledge of networking fundamentals: TCP/IP, Routing, VPN's, VLAN, Load Balancing, etc

TOOLS USED

- Source code management Tool: Git.
- Test Management Tool: Azure Board.
- Operating System: Linux, Windows
- Continuous Integration/Continuous Deployment (CI/CD): Jenkins
- Automation Tools: Ansible
- Container Technology: Kubernetes, Docker
- Build Management: Maven
- Cloud Platforms: AWS, GCP(Basic)
- Programming Languages: Python
- Scripting: shell, Linux.

Professional Experience: Technical Support Engineer

InVendis Technology | [Bangalore] | June 2023 – Present

- **Single Point of Contact (SPOC):** Acted as the SPOC for both **Machine Talk** and **Ubuntu Towers**, coordinating communication between development teams and clients, and managing all technical escalations effectively.
- **Server & Application Monitoring:** Monitored servers and applications for performance and uptime, ensuring that all systems were running optimally to prevent site downtimes.

TRAINING

1. Completed 8 months training in Linux, Aws and DevOps in Besant technology.
2. Gained knowledge of Linux Operating system.
3. Hands-on AWS services like Amazon EC2, ELB, Internet gateway, EC2, AWS Lambda, ECS, S3, EBS, RDS, DynamoDB, VPC, Route 53, SNS, IAM, CloudWatch, CloudTrail.
4. Demonstrated proficiency in automation and CI/CD processes, contributing to a well-rounded skill set. 

EDUCATION

Bachelor of Engineering in Electrical and Electronic Engineering

St. Johns college of engineering and technology, Kurnool, Andhra Pradesh

CGPA: 7.23 | 2019 – 2023.

Intermediate in Narayana junior college

Percentage: 9.3. | 2017-2019.

PROJECTS:

PROJECT: Machine Talk & Ubuntu Towers

Role: Technical Support Engineer, SPOC, June 2023 – Present

- Provided comprehensive technical support for the Machine Talk project & Ubuntu Towers, focusing on server monitoring, troubleshooting, and maintenance of client-facing applications.
- Managed site updates and ensured smooth integration of new sites into the server infrastructure.
- Acted as the SPOC for all technical escalations, liaising with clients and development teams to resolve issues efficiently.

INTERSHIP PROJECT:

Project Name: Deploy an E Commerce Three Tier application on AWS EKS | 8 Services and 2 Database

Types of Application: Python

Tools Used: Git, Maven, Jenkins, Dockers, Ansible.

Responsibilities:

- Detailed technical knowledge and hands-on experience of DevOps Automation
 - Used Jenkins for Continuous Integration and deployment into Tomcat/WebLogic Application Server.
 - Experience in using version controller tools like git.
 - Managed Git repositories for branching, merging, and tagging.
 - Developed Shell Scripts for automation purpose.
 - Good Expertise on Dockers.
 - Utilized Docker containers to encapsulate application dependencies and ensure consistent deployment across various environments.
 - Integrated AWS services, including AWS Elastic Beanstalk and AWS Code-pipeline, to enable seamless and scalable application deployment
-
