CERTIFICATIONS

- **Microsoft Certified: Azure DevOps Expert**

Issued by: Microsoft

Credential ID: B5681DA0B34055C4

- **Microsoft Certified: Azure Fundamentals**

Issued by: Microsoft

Professional Summary:

- ❖ Having 4 years of IT Experience, have been working with Cloud Applications, Private and Public Cloud Infrastructure services and DevOps practices.
- ❖ Over 4 years of experience in Azure Cloud Infrastructure environments.
- ❖ Preparing SOP documents, Runbooks related for Azure administration operations and for developers.
- ❖ Hands on with version control using Git and concepts like hooks, actions, branching, tagging, release management, hotfixes etc.
- ❖ Good knowledge of working with Container and Docker/Kubernetes.
- ❖ Experience Working configuring application servers like Apache, Nginx, Tomcat, WebLogic etc.
- ❖ Work independently & collaborate with customer teams on daily basis to understand requirements, plan & implement tasks, and provide regular status updates.
- ❖ Strong knowledge of setting up cloud infrastructure & services using best practices
- ❖ Expertise in Microsoft Azure and its relevant build, deployment, networking and security technologies in cloud and hybrid environments.
- ❖ Technical understanding of Microsoft Identity and Access Management products.
- ❖ Familiarity with service configuration and provisioning with tools like, Terraform, ARM Template, Cloud Formation, Infrastructure automation.
- ❖ Excellent customer facing communication, presentation skills and technical writing capability.
- ❖ Expertise in implementing a production ready, highly available, fault tolerant **Kubernetes** infrastructure. Working on Scheduling, deploying and managing container replicas on a node cluster using Kubernetes.

Professional Experience:

- ❖ Working as a Cloud Engineer in HCL Technologies from Jan 2022 to till date.
- ❖ Worked as a Software Engineer in Reliance Jio Info-Comm Ltd from Mar 2020 to Feb 2021.

Education Summary:

- ❖ Bachelor of science (BSc computers) from Sri Venkateswara university (Tirupati) in 2020.

Technical Skills:

- ❖ Version control tool: Git, GitHub.
- ❖ Build tool: Maven, Gradle, .Net.
- ❖ Deployment env: Tomcat, Docker, Kubernetes, App service, Function app.
- ❖ CI/CD Tool: Azure DevOps
- ❖ Code quality tool: SonarQube.
- ❖ Ticketing tool: Jira, Azure boards.
- ❖ Change/incident management: Service now, HP Service Manager.
- ❖ Monitoring tool: Azure Monitoring, Prometheus & Grafana
- ❖ Scripting language: PowerShell, Bash scripting.
- ❖ Azure Cloud: Virtual Machines, VNet, Subnet, Nsg, Load balancers, Azure monitor, AD, ASR, AKS, ACR, ACl, Key vault, Azure log analytics, Azure automation account

Professional Experience:

Project: HCL Technologies

Duration: Jan 2022 – Current

Designation: Cloud/DevOps Engineer

Roles & Responsibilities:

- ❖ Creating and managing Azure virtual machines, ensuring optimal performance and scalability.
- ❖ Implemented Azure Virtual Networks, Subnets, and Network Security Groups to facilitate secure communication.
- ❖ Experience in Microsoft Identity and Access Management products, ensuring a secure and compliant Azure environment.
- ❖ Deployed applications using Docker containers and Azure Kubernetes Service (AKS).
- ❖ Optimizing efficiency and scalability of AKS, Authored Docker Files and Kubernetes manifest files for application deployment and orchestration.
- ❖ Proficient in Azure Storage Explorer, facilitating efficient management of storage resources.
- ❖ Scheduled database backups using Maintenance plans and Job activities, ensuring data integrity and availability.
- ❖ Utilized Terraform modules and resources for provisioning Azure infrastructure, ensuring consistency and repeatability.
- ❖ Collaborated with cross-functional teams to monitor application performance, implementing automated system administration monitoring.
- ❖ Responded effectively to interruption of service events, troubleshooting Azure-related issues and ensuring continuous service availability.
- ❖ Collaborated with the Development team to establish efficient CI/CD processes and reviewed builds for optimization.

Project: Reliance Jio Infocomm Ltd

Designation: Cloud Engineer

Roles & Responsibilities:

- ❖ Setup/Managing Linux Servers on Azure (VM, VNet, Storage, LB, SSL, N/W Security Groups, AKS, ACR, SQL, and Auto scaling).
- ❖ Creating/Managing DNS records on Azure DNS and go-daddy panel.
- ❖ Performed Storage account creation, policy-based access control.
- ❖ Configuring domain name, creating record sets, configuring the DNS Failover and configuring Health check of the domain in Azure DNS
- ❖ Implemented and maintained the monitoring and alerting of production and corporate servers/storage using Azure Monitor.
- ❖ Experience with Build Management tool Maven for writing pom.xml.
- ❖ Experienced in build and deployment of Java applications on to different environments such as DEV, Pre-Prod and Production.
- ❖ Deployed the java application into web application servers like Apache Tomcat.
- ❖ Managed Azure Infrastructure using Terraform using modules, managing existing servers and automation of build/configuration of new servers.
- ❖ Worked with Docker and created multiple containers, images, and managing Docker volumes and pushing docker images to ACR and also had experience on writing the Dockerfile.
- ❖ Having good implementation experience with Azure Kubernetes Service (AKS).
- ❖ Created the deployments, services and ingress flows for the application setup in the Kubernetes cluster.
- ❖ I involved in k8s application deployment using the Rolling Deployment strategy.
- ❖ Experience in creating Kubernetes cluster with Kubernetes Master and Kubernetes Worker nodes for deploying application on it.
