URL: <https://digilead.in/>

At DIGILEADS, we're more than just a website design and development company. Our team thrives on creativity. We blend design aesthetics with cutting-edge technology to craft websites that leave a lasting impression.

SCCM

Environment: HTML, CSS, SASS, Bootstrap, Figma, Visual Studio Code

The SCCM tool is component and structure content repository. It shall also provide a platform for assembling components to create meaningful regulatory documents which can be directly submitted to the health authorities. Additionally, this product shall be used by end-users for strategic decision making as well as content comparison via advanced content search capabilities.

Optima

Environment: HTML, CSS, Bootstrap, jQuery, Visual Studio Code

This is a powerful IoT-enabled AI platform for the oil and gas industry. Optima is a digital enterprise platform that collects and aggregates troves of data from various sources and generates rapid insights for effective management and monitoring of operation and resources. The platform leverages new-age technologies, including the Internet of Things (IoT), Big Data, Edge Computing, Artificial Intelligence (AI), Block chain, and Mobility to help enterprises deliver data intelligence everywhere and spot moments of opportunities—and risks—for sustained business efficiency.

Thrive

Environment: HTML, CSS, Bootstrap4, jQuery, Visual Studio Code

Employee portal maintains the Employee Details, HR Module and On-Boarding and Off-Boarding. Employee Details manage the Employee Reports and Awards, Off-Boarding. HR Module maintains the all employee details and supports administration views for employee history. On-Boarding implemented for Hiring and Approval of Employee.

MedQuest Diagnostics

Environment: HTML, CSS, Bootstrap3/4, jQuery, Photoshop, Illustrator, Visual Studio Code

URL: <https://www.medquestdiagnostics.com/>

APP URL: <https://play.google.com/store/apps/details?id=com.app.medquestdiagnostics>

The Medquest App is used for android mobiles to book the tests and health packages. The advantage of this app is once we can download the application and we can login into the application and the tests data will be available after taking the tests and all.

Medical Diagnostics Management System

Environment: HTML, CSS, Bootstrap3, jQuery, Photoshop, Illustrator, Visual Studio Code

End to end solution for medical diagnostics business. Starting from patient registration, it involves billing, collection of samples, assigning of radiology procedures to the doctors, status of sample processing at the lab and creating patient reports and dispatching the same to the corresponding patients. Various types of billing reports could also be generated for accounting purposes. Branch wise / case type reports could also be generated for various date ranges to know the number of patient visits and total business generated for any selected day or date range. Inventory management is also an inbuilt module which helps the back-end purchase team to take note of the material used in different branches each day. Branches can raise various type of requests through this system ranging from bill cancellations to stock updating request through this system.

Attendance Management System

Environment: HTML, CSS, Bootstrap3, jQuery, Visual Studio Code

HR related dashboard for managing the employee attendance system which includes but not limited to daily attendance, application of leaves, late coming and running payroll.

EZY Convenience Store

Environment: HTML, CSS, Bootstrap3, jQuery, Visual Studio Code

Our company and started buying in Bulk and started supplying to many other convenience store like our stores and started supplying to some major branded companies across Australia like Ezy Convenience Stores, BP Petroleum Stores, United Petrol Stations, Exotic Pizza. We strive to give independent retailers the best service and the best deal for our customers and clients. That's what makes us different to the major convince stores
