SUMMARY

Results-Driven Software Developer with 1+ Years of hands-on Experience. In developing HMI systems and working with front-end and back-end technologies. Seeking a challenging position where I can leverage my expertise in C++, XML, and Qt tools to contribute to the growth of the organization and further enhance my skills.

EXPERIENCE

Junior Software Engineer

People Tech Group

04/2023 - Present

- Developed HMI Systems for In-Vehicle Clusters: Played a key role in designing and implementing HMI modules for an in-vehicle cluster system, as per the requirements from General Motors, including modules such as Zone1, RHMI, Assistance, Alerts, and Telldates for various display types (8, 11, 34).
- XML & C++ Development: Created and optimized XML files based on UI sketch files provided by clients, ensuring seamless integration of dynamic user interfaces with backend systems using C++ and Qt.
- Cross-functional Collaboration: Worked closely with cross-disciplinary teams, including design and QA teams, to ensure that the final product met the client's specifications and adhered to quality standards.
- Tool Expertise: Gained proficiency in using tools such as Qt, Visual Studio, Jira, Bitbucket, and SourceTree for development, version control, and project management.
- Optimization and Testing: Conducted unit testing and debugging, improving the performance of the system and ensuring its robustness across different platforms.
- Client Interaction: Acted as a liaison between the development team and clients, ensuring that the product was delivered in alignment with client requirements and on schedule.
- Performance Improvements: Contributed to optimizing C++ code, which resulted in faster load times and improved user experience.

TECHNICAL SKILLS:

- Programming Languages: C++, C, XML
- Development Tools: Qt Creator, Jira, We can, Odi Simulator
- Version Control: Git, Bitbucket, SourceTree
- Operating Systems: Windows

SOFT SKILLS:

- Team player and Responsible.
- Result Oriented Person.
- Honest and Time bound towards the work.
- Adaptable and quick to learn new technologies and tools.
