Email: bhavana717@gmail.com

 : <https://www.linkedin.com/in/bhavana-ms-0876a2280/>

Objective

I am a motivated individual pursuing a Master's in Computer Applications, with a strong foundation in Java Full Stack Development. I have hands-on experience through my internship, where I contributed to building real-time projects using Angular and Spring Boot. My technical skills include Java, Spring Boot, Angular, HTML, CSS, JavaScript, and MySQL, supported by strong communication and teamwork abilities. I am enthusiastic about learning new technologies and applying them to create efficient, user-friendly applications.

Education

Tumkur University PG Centre, Tiptur Master Of Computer Applications (MCA) CGPA: 7.3	2023-2025
PES Degree College, Mandya Bachelor of Computer Applications (BCA) CGPA: 6.7	2020-2023

Soft Skills: Proficient in communication, team worker, efficient in bug detection

Project

(i) Kidney Stone Detection Using Spring Boot & Angular

A full-stack web application that detects kidney stones from CT scan images using machine learning. The backend is developed using **Spring Boot** to handle prediction APIs, while the frontend is built with **Angular** for an interactive and user-friendly interface. The system classifies images, displays results instantly, and supports efficient medical diagnosis..

(ii) Disaster Response and Control Android App(Android,Java/Kotlin)

A mobile app designed to support disaster management through real-time alerts, GPS tracking, and quick incident reporting. It enables effective communication between users and rescue teams while providing mapping of shelters and emergency resources.

Languages

English, Kannada,

Certifications

- Full Stack Java Developer
