

Bhavyashree N

📍 Bengaluru, India | ✉ bhavyashreen41@gmail.com | 📞 +91 9535701742 | in LinkedIn

Profile

Results-driven Software Engineer with over 2 year of experience in designing, developing, and deploying scalable software solutions. Proficient in programming languages like C++, Java, Python, HTML. Skilled in analyzing complex problems, optimizing code performance, and delivering high-quality software. Adept at collaborating in cross-functional teams to achieve project goals on time.

Experience

Associate Software Engineer, ESI Software Pvt Ltd - Bengaluru, India Sep 2022 – Present

- Debugged and optimized C/C++ code, implemented efficient data structures, and improved CAD/CAE workflows by reducing pre-processing times.
- Developed and optimized highly **multithreaded** system-level applications in C++ on **Linux**, achieving a 30% improvement in execution speed and ensuring high reliability.
- Diagnosed and resolved critical issues in distributed systems, reducing system downtime by 25% and enhancing overall performance and stability.
- Streamlined CI/CD workflows for Linux-based applications, ensuring seamless integration and delivery processes.
- Conducted performance analysis and optimization of latency-sensitive applications, achieving a 25% reduction in response time for critical operations.
- Designed and implemented key features for distributed systems, leading to a 20% improvement in system efficiency and scalability.

Education

Dayananda Sagar College of engineering 2018 – 2022
BE in Civil Engineering; CGPA : 9.01

Projects

Casting Solutions, RTM, and PAM Composites

- Developed and optimized dynamic GUIs in C++ for improved user experience and enhanced system performance in multithreaded applications.
- Built a scalable test automation framework for cross-platform applications on Windows and Linux, reducing manual testing efforts by 40% and improving **test coverage** by 30%.
- Streamlined CI/CD workflows for business-critical desktop clients, reducing **deployment** time by 40% and ensuring efficient delivery pipelines.
- Configured development environments to optimize integration and streamline complex system setups, enhancing developer productivity.
- Diagnosed and resolved performance bottlenecks using **profiling** tools, achieving significant improvements in execution speed and resource utilization.
- **Technologies Used:** C++, Multithreading, MFC, Python, XML, Git, GitLab, Linux, Jenkins, Jira, Design Patterns, SonarQube, Vtune Profiler, Linux Command Line Interface (CLI)

Beam and Column Structural Analysis

- Presented a technical seminar on structural integrity analysis of beams and columns using **Python** libraries.
- Demonstrated real-world applications of computational tools in structural engineering to peers and faculty.
- Leveraged **Pandas** for data handling, **NumPy** for computational modeling, and **Matplotlib** for visualizing stress and load distributions.
- **Technologies Used:** Python (Pandas, NumPy, Matplotlib), Google Colab

Skills

- **Programming Languages/Databases:** C, C++, Java, Python, HTML
- **Databases:** MySQL, SQL
- **Operating Systems:** Linux, Unix, Windows
- **Technologies:** Multithreading, CI/CD Pipelines, Distributed Systems
- **Methodologies:** Agile (Scrum), Object-Oriented Design, Test-Driven Development (TDD)
- **Tools & Frameworks:** Git, Jenkins, Visual Studio, SonarQube, gdb, valgrind, Vtune, Unit Testing Frameworks, CI/CD Pipelines.
- **Key Strengths:** Performance Optimization, System Design, Debugging
- **Soft Skills:** Problem-solving, Analytical Thinking, Team Collaboration, Strong Communication

Certificates

C++, Git, Linux, Python, Java, Design Patterns in Java, SQL,

Extracurricular

- **BEST PROJECT OF THE YEAR 2021-22**, 45th Series student project program held by KSCST
- **DSCE ACM-W chapter, Volunteer Staff**, coordinated and managed events and awareness campaigns, ensuring smooth execution.
