SUMMARY

Aspiring AWS DevOps Engineer with strong problem-solving skills and hands-on experience in automation, CI/CD pipelines, and infrastructure provisioning. Proficient in AWS services, Terraform, Ansible, Docker, and Jenkins. Demonstrated success in reducing deployment time and improving operational efficiency through automation. Seeking to leverage and expand my AWS DevOps expertise in a collaborative team environment.

EDUCATION

TKR College of Engineering and Technology – Hyderabad.

Sep 2020 – Jul 2023

B. Tech in Mechanical Engineering

7.7 CGPA

Government Polytechnic College Kothagudem – Kothagudem.

Jun 2017 - Apr 2020

Diploma in Mechanical Engineering

79.6%

EXPERIENCE

SOCIALTEK AI&ML BUSINESS SOLUTIONS PVT LTD.

Jan 2024 – Jun 2024

DevOps Engineer – Intern

- Automated CI/CD pipelines, reducing manual intervention by 80% and improving deployment efficiency.
- Developed Terraform and Ansible scripts, accelerating infrastructure provisioning by 60%.
- Integrated software components with 100% alignment to DevOps requirements, enhancing operational performance.

PROJECTS

1. Deploying 3-Tier Architecture in Aws using Terraform.

- Automated AWS Infrastructure provisioning using Terraform, improving deployment speed by 70%.
- Designed and deployed a 3-Tier Architecture with VPC, EC2, RDS, and implemented ALB for 50% better traffic Distribution.
- Managed IAM roles and configured ASG, enhancing security and availability.

2. Implementing a Continuous Integration/Continuous Delivery (CI/CD) pipeline.

- Automated the software delivery process, reducing deployment time by 70%.
- Built CI/CD pipeline that automatically build, test, and deploy code, increasing efficiency by 60%.
- Eliminated manual errors through automation, improving feedback accuracy by 80% and accelerating production release cycles by 50%.

3. Deploying Web Application using Ansible.

- Developed Ansible playbooks to automate Nginx and application component installation, reducing setup time by 50%.
- Standardized configurations across all environments, ensuring 100% consistency in deployments.
- Streamlined deployment procedures, reducing manual errors by 90% and boosting efficiency by 50%.

4. Jenkins Master-Slave Configuration.

- Configured Jenkins master and slave nodes to optimize build job orchestration and workload distribution.
- Provisioning web applications on slave servers via Jenkins master for efficient installation by 40%.

SKILLS

AWS Cloud **AWS Services:** IAM, VPC, EC2, RDS, ASG, ELB, EBS, CLOUDWATCH, S3, CLOUD FORMATION, AWSCLI

Containerization: Docker

Scripting: Bash, Shell Scripting

CI/CD: Jenkins

Infrastructure as Code: Terraform

Version Control System: Git, GitHub

Orchestration: Kubernetes

Configuration Management: Ansible

Monitoring: Prometheus, Grafana

Nexus, SonarQube and Trivy.

Programming Language: Python

Operating System: Linux, Ubuntu.
