Objective

Seeking an opportunity to join an organization that values the utilization of my skills while providing a platform for professional and personal growth. Committed to contributing in a resourceful, innovative, and flexible manner, striving to demonstrate potential, implement ideas, and maintain a continuous learning mindset throughout my career.

Skills

- Core Java Advanced Java Spring Spring Boot Hibernate Microservices Python RestAPI
- MySQL Problem-solving JDBC JSP DSA Servlet HTML Flutter PHP

Work Experience

Intern Java Developer , Bellurbis Technologies Pvt. Ltd.

Sep 2023-Aug 2024

- "Worked on the 'Awas' project, handling various modules and Java development tasks."
- "Developed backend functionality and implemented login module operations."
- "Focused on backend functionality, specifically the Admin module, and efficiently performed data storage operations."

Project Awas:-Developed a web-based loan processing system that allows customers to apply for loans seamlessly. The project integrates loan approval and disbursement processes, enhancing efficiency. It was built using Java for backend development and MySQL for database management.

Project Medical Hub:-This e-commerce solution is a web application that enables customers to purchase medicines online. The system allows medical stores to sell medicines over the internet and deliver them directly to customers' locations. Customers can place orders by uploading a doctor's prescription and providing their address.

- Developed and managed the Admin Module, ensuring secure authentication, data storage, and user management.
- Implemented database operations using Spring Boot, Hibernate, and MySQL.
- Worked on API development for order processing and prescription verification.
- Ensured smooth login and authentication using Spring Security.
