EDUCATION

Masters in Computer Application

Post Graduation

📅 2022-2024

Jain(Deemed-to-be) University

8.6 CGPA

📍 Bangalore, India

Bachelors in Computer Application

Graduation

📅 2019-2022

Siliguri Institute of Technology

9.4 CGPA

📍 West Bengal, India

CERTIFICATIONS

- NPTEL Certification in C programming
- Certification in The Ultimate JavaScript Course: Beginner to Advanced
- Certification in Fundamental of Data Structure.
- Java Programming Masterclass.
- AI using Python.
- Advanced technique in knowledge discovery and data mining.
- The Complete Flutter Development Bootcamp with Dart – UDEMY.

PROJECTS

- **Online Book Store:** Using HTML, CSS, JavaScript, NodeJS, MongoDB

A user-friendly Online Bookstore project in which users can log in or register, view the available books, select books along with their quantity, and buy them.

Crafted a web platform featuring a diverse collection of songs for users to play and enjoy.

- **CRUD User Management System:** Using Nodejs, Express, MongoDB

It will allow you to search and you will be able to add new customers, update customers and delete them.

- **Smartphone Recommendation system(Jupyter Notebook)**

Built a recommendation system using popularity based and collaborative filtering methods to recommend mobile phones to a user which are most popular and personalized respectively.

TECHNICAL SKILLS

PROGRAMMING: C, JAVA

Web Development: HTML,CSS,JS

App Development: Flutter, Android Studio

TOOLS/TECHNOLOGIES: MongoDB,SQL,Weka, Node.js, Unix, Jupyter Notebook

RESEARCH

A Study on Green Computing and Sustainable Development

Dr. Kamalraj R, Professor, Jain(deemed-to-be) University.

- It is the study and practice of using Computing resources efficiently. Study focuses on Designing, manufacturing and disposing computers and servers with no impact on the environment.

Enhancing Road Safety: An Integrated IoT and AI Approach for Car Accident Prevention and Detection.

Dr. Kamalraj R, Professor, Jain(deemed-to-be) University.

- Proposed an integrated IoT and AI system for automated vehicle speed control and accident prevention, enhancing road safety. Utilized ultrasonic sensors and AI algorithms to monitor and analyze car distances in real-time, providing warnings and alerts to drivers to prevent accidents.
