Summary

Experienced in building dynamic web applications using HTML, JavaScript, React.js, and Node.js. Skilled in Solidity for smart contract development and blockchain integration, with hands-on experience in deploying DApps and working on real-world blockchain projects. Proficient in containerization using Docker, implementing scalable and efficient infrastructure for both development and production environments. Strong problem-solving abilities and a passion for decentralized technologies, with expertise in frontend and backend development.

Projects

Drug Supply Chain DApp

The Drug Supply Chain DApp ensures transparent tracking of pharmaceuticals from manufacturer to consumer. Built using Solidity for smart contracts and HTML, CSS, and JavaScript for the frontend, it enhances supply chain integrity and reduces counterfeiting.

Meme Coin Creator DApp

I've developed a DApp on the Ethereum blockchain using Next.js, HTML & CSS for a perfectly integrated UI, with Express.js for the backend and Solidity smart contracts deployed using Hardhat. Users connect their MetaMask wallets to create and view meme coins securely.

Crypto Currency Converter

My cryptocurrency converter is built using HTML, CSS & React.js for the frontend and Node.js with Express.js for the backend. By integrating the CryptoCompare API, users can access up-to-date and accurate conversion rates, providing a reliable tool for navigating the volatile crypto market.

NFT Staking Smart Contract

Developed a smart contract for NFT staking, enabling users to earn ERC20 token rewards. Implemented features for staking, unstaking, reward claiming, and dynamic reward rate adjustments, ensuring efficient reward distribution and secure asset management using Solidity and OpenZeppelin. The program was containerized using Docker, enabling seamless deployment and scalability across different environments.

Experience

Wellcove

Trainee Associate

 <https://wellcove.com/>

May 2024-Aug 2024

Remote

Provided data analytics and visualization services to help gain insights from a big data. Developed and implemented VBA macros for data reporting, calculating averages, and making predictions based on datasets.

Data management. Maintained & organized large datasets. Debugging & Troubleshooting.

Pharmeasy

CDO Pharmacist

 <https://pharmeasy.in/>

Dec 2021-June 2022

Bangalore, India

Provided online customer support and prescription validation.

Leveraged Excel, Data management & daily report making.

Education

Code Eater

Bitcoin/Ethereum/Solana

 [The Code Eater course begins with blockchain fundamentals, covering Bitcoin and Ethereum. Starting with Solidity for Ethereum smart contracts, it emphasizes learning and developing various smart contracts—from DeFi and token contracts to governance systems and supply chain solutions.](#)

Nov 2022-May 2024

Blockchain

Rajiv Gandhi University Of Health & Sciences

Pharma

2017-2023
