Professional Experience

Software Engineer,

Tech Mahindra

July 2024 – present | Hyderabad, India

- Involved in Process Automation collaborations with business users globally to analyze business processes, recommend RPA-based solutions for the processes, and develop robots using UiPath.
- Working knowledge of UiPath RPA Studio concepts, such as debugging a workflow, managing packages, creating variables and arguments, and controlling flows.
- Worked on UI elements, Data scraping, Selectors, PDF in UiPath Studio.
- Familiar with UiPath components, features, and methods of automating business processes. Hands-on experience in developing.

Associate Software Engineer,

People Tech Group

October 2021 – July 2024

Hyderabad, India

- Applied strong analytical and solution-oriented approach to deliver business-critical solutions.
- Leveraged effective communication and cross-functional collaboration to ensure successful implementation of RPA projects.

Profile

- Having 3.3 years of experience, with relevant 3 years of experience in Robotic Process Automation.
- Involved in Process Automation collaborations with business users globally to analyze business processes, recommend RPA-based solutions for the processes, and develop robots using UiPath.
- Working knowledge of UiPath RPA Studio concepts, such as debugging a workflow, managing packages, creating variables and arguments, and controlling flows.
- Worked on UI elements, Data scraping, Selectors, PDF in UiPath Studio.
- Familiar with UiPath components, features, and methods of automating business processes. Hands-on experience in developing.
- Created and scheduled the bots in UiPath Orchestrator. Expertise in scheduling, triggering tasks with advanced features of task-queuing technology, and deploying tasks in Remote PCs.
- Excellent communication and interpersonal skills. Committed and motivated team player with analytical skills and problem solving.
- Hands-on experience in the software delivery lifecycle on RPA projects, including process mapping, business requirements, and functional and technical specifications.
- Experienced in using UI Path Studio, Orchestrator, screen, Data, and Web Scraping technique

Projects

UiPath Projects

Project : 3

Client : wYne.ai [🔗](#)

Project Name : wYne

Role : RPA developer

Tools : UiPath, Orchestrator

Process : Adding the extracted data into the inventory using RPA

Environment : Web Automation, Window Automation, Email Automation

Project Description:

- Auto-ingest partner wine inventory data to wYne DB schema and auto refresh the DB. The Inventory process is used to add more restaurants into the wYne DB.

- Seeking to contribute to dynamic teams by developing and implementing intelligent automation solutions using UiPath technology.
- Committed to continuous enhancement of skills and knowledge in RPA to deliver transformative solutions that meet and exceed organizational objectives.

Process Associate, Mouri Tech

July 2021 – October 2021

Hyderabad, India

- Optimized customer experience by delivering superior services and effectively troubleshooting issues.
- Developed production techniques and production processes to meet customer and organizational needs.
- Adhered to all deadlines, managing time effectively to complete tasks within designated timeframes.

Skills

- UiPath Studio
- UiPath Orchestrator
- RPA
- Document Understanding (DU)
- AI Centre Advanced UI Automation
- Communication
- SQL
- Java
- Jira

- The process starts with scraping the wine menu of the restaurants and extracting the wine attributes from Vivino Website, Wine searcher and adding those attributes into the wYne DB by using RE Framework. There is another process which auto refreshes the DB.

Project : 2

Client : Assured Partners

Project Name : Premium Payable

Role : RPA Developer

Application : EPIC (Desktop Automation), Email Automation.

Project Description:

- Objective of this project is to automate The Statements/Invoices with a robot procedure which means it works daily process from client-based input which can be run at a schedule time daily.
- Automation was developed by using Dispatcher, Document Understanding, Performer way. Initially Dispatcher bot will run based on client input mail which has statements/invoices.
- DU bot will run to extract the data for which we are searching. Finally, Performer Bot will run accordingly to upload the data into desktop application.

Project : 1

Project Name : Create Job Profile

Role : RPA Developer

Website : Workday (Internal)

Project Description:

Automating the create job profile in Workday through Ui Automation with excel input data by using classic activities.

Education

Vivekananda Institute Of Technology & Science

2016 – September 2020 | Karimnagar, India

Electronics and Communication Engineering
