

Name: Busa Hanuman
Designation: Software Engineer
Mobile: +91 9110509606
Email: hanuman.busa@gmail.com

Background

- Hanuman is a senior Mulesoft Developer in Accenture.
- Hanuman is having overall 4.7 years of experience and in that 4.1 years relevant to the Mulesoft Integration.

Education:

- Hanuman holds a Bachelors degree in Computer Science from SV University, Tirupati, Andhra Pradesh, India.

Expertise

- Experience in designing and developing RAML based API's using Any point API Platform.
- Hands on experience in us several connectors like HTTP, Database, Sales force, File and SFTP.
- Good exposure to Continuous Integration and Delivery using DevOps GIT.
- Hands on experience in implementing Error handle mechanism and writing MUnit test cases to validate the Muleflows.

Certifications

- Mulesoft Certified Developer-I

Professional Experience

- Hanuman has 4.1 years of experience in Mulesoft integration and worked on different phases of project development life cycle.
- Designed and Developed enterprise services using RAML and REST based Apis and various Transformation in Mule-ESB based on use case.
- Familiarity with the Regular Web Service applications such as JSON, XML, HTTP, SOAP and Restful API and VPC.
- Knowledge in creating Flows, Sub Flows, exception strategy and other activities.
- Worked with scheduler to schedule Mule Flows through API calls for data synchronization..
- Good experience in creating API specification, Implementing REST and Consume SOAP Services and secured by Oauth2.0 and JWT methods.
- Managed and deployed Mule applications across both On-Premises and CloudHub environments using Anypoint Runtime Manager.
- Developed and maintained DataWeave scripts for data transformation and integration
- Good Understanding of connectors like Database, SAP Integration, AWS, Salesforce and X12.
- Knowledge in GitHub as a repository and used Maven, Jenkins for build and deployment respectively.
- Good Experience in Software Development Life Cycle (SDLC) including Requirement Analysis, Development, Testing and involved in the manual and CI/CD deployment activities.

Project Experience

Bank of Ireland (Banking Domain):

- Designed and developed enterprise services using RAML and REST based APIs using APIKit
- Developed integrations using connectors such as Data Base, HTTP, and FTP.
- Done with transformers, exception handling, testing & security of Mule APIs through OAuth2.
- Developed the services to access the core services and provisioning services using Mule ESB v4.4.
- Created MULE ESB artifact and configured the MULE configuration files and deployed.
- Designed and developed enterprise services using RAML and REST based APIs using APIKit

Medtronic Healthcare (Healthcare Domain)

- Involved in discussions related to the application.
- Checking the Cloud Hub logs for providing request data to different teams as on when required.
- Re triggering failed request and running scheduler in the timely manner.
- Performing performance testing internally based on Volumetric analysis.
- Enabling debug logging and anypoint monitoring.
- Creating and binding queues with exchanges based on the request.
- Analyzing issues and providing solutions to different teams by debugging the applications.
