-

PROFESSIONAL EXPERIENCE

Muthoot Group

Business Analyst - HRIT (April 2024 – Present)

- Managed HRMS software for a 50k employee organization spanning 10 verticals and 22 sub-verticals, enhancing operational efficiency. Working under the Muthoot group Directors and reporting to GM-IT
- Administered change requests for HRMS modules, including Attendance, TA-DA, Performance Management, Leave, Payroll, and other core HR functions.
- Collaborated with HR stakeholders to gather requirements, document user stories, and develop functional specifications for system enhancements.
- Designed UI prototypes (Figma, Draw.IO and Lucidchart) to improve user experience and optimize workflow processes within HRMS and ATS applications
- Led the evaluation and implementation of a new Applicant Tracking System (ATS) by assessing multiple vendors and selecting the most suitable solution.
- Defined and documented requirements for ATS, Referral Portal, IJP, BGV Portal, HRMS, and CRIF integration, ensuring seamless system interoperability.
- Standardized recruitment processes across 10 verticals, aligning offer letters, CTC structures, onboarding workflows, and approval matrices for process uniformity.
- Worked on Learning management APK deployment, creating release materials for Play Store submission.
- Developed and maintained the POSH application for compliance and reporting for 4 verticals.
- Enhanced the Sales Buddy application by implementing location tracking for TA-DA calculations.
- Prepare dashboard and project reports for monthly HRMS Project review for Muthoot group directors meeting.

Brio Technologies

Business Consultant (June 2023 – Jan 2024)

- Collaborate with clients to understand their needs, challenges, and business goals and optimize existing HR processes, driving notable improvements in operational efficiency.
- Utilized Figma and Balsamiq to design Wireframes and prototypes for UI design
- Configured and integrated HRMS solutions with enterprise systems, ensuring seamless alignment of workflows and reporting tools to meet HR policies and enhance data accuracy.
- Provided end-user support, conducted training sessions, and ensured optimal utilization of HRMS features, elevating user satisfaction and system adoption.
- Designed UI prototypes to improve user experience and optimize workflow processes within HRMS through FIGMA
- Investigated and resolved HRMS-related issues in collaboration with IT teams, resulting in reduced system downtime and timely resolutions.
- Conducted extensive training for HR and recruitment teams on HRMS software usage, troubleshooting, and continuous support.
- Gathered user feedback and collaborated with software development teams to propose enhancements for HRMS software functionality and usability.

Paysquare Consultancy Ltd

Business Development Manager (April 2022 – Dec 2022)

- Collaborated with HR stakeholders to analyze business processes, gathering requirements for HR Management Software (HRMS) implementation.
- Conducted workshops, interviews, and requirement analysis sessions to prioritize HR module functionalities.
- Created comprehensive Business Requirement Documents (BRD) aligned with HR policies and organizational needs.
- Translated HRMS requirements into detailed user stories using Agile methodologies.
- Configured and customized HRMS software to enhance HR operational efficiency.
- Conducted system testing, UAT, and provided comprehensive training for seamless software adoption.
- Acted as a liaison between HR users and technical teams, ensuring effective communication.
- Provided first-level HRMS support for internal queries, including payroll and HR functions.
- Implemented Agile Methodology consistently and built a proficient team for post-implementation support.

Acumen Infinite Solutions

Business Analyst (Aug 2020-Dec2021)

- Created detailed Business Requirement Document, use cases and user stories, managing product backlogs efficiently using Jira.
- Conducted comprehensive workshops, optimizing business processes for enhanced operational efficiency
- Utilized Figma, Balsamiq to design Wireframes and prototypes, incorporating user feedback to refine UX.
- Actively engaged in SCRUM ceremonies, efficiently tracking projects using JIRA.
- Led teams for UAT testing, ensuring high-quality project deliverables and resolution of backlogs.
- Facilitated frequent status meetings, product demos, and stakeholder reviews for alignment among clients, teams, and vendors.

HiCare Services Pvt Ltd.

Business Development Manager (Nov 2019 - June2020)

- Analyzed business processes, ensuring product alignment with client needs.
- Created impactful business documents and proposals for effective communication.
- Reported on business trends, optimizing sales strategies for enhanced performance.
- Evaluated and refined marketing strategies, boosting product visibility.
- Managed and trained a team of technicians, ensuring smooth service operations.
- Contributed to marketing campaigns and social media postings, enhancing brand visibility and engagement.
