Professional Summary :

Backend and database developer with 2.1 years of experience at Mantra Technologies, specializing in MySQL database development, optimization, and maintenance. Skilled in using stored procedures, views, tables, and triggers to ensure efficient data handling and integrity. Proficient in backend development using FastAPI with ORM, particularly SQLAlchemy, to implement robust API routers. Adept at designing and developing high-performance APIs and web applications, performing CRUD operations, and ensuring seamless integration between application objects and database models. Proven ability to contribute to the development and maintenance of scalable backend systems and optimized database solutions.

Skills

MySQL

Python

FastAPI

ORM

SQL

Mongodb

Sqlmodel

Elastic Search

Pytest

OAuth 1.0

Github

Postman

Work History

Jun 2022 -
May 2023

Software Engineer

Mantra Technologies, HITEC City, Hyderabad

HRSprout & Team Applications

- **Project Overview:** Contributed as a database developer for HRSprout, an employee management platform handling employee details, leaves, attendance, and payroll, and Team, an organizational chat application.
- **Database Design and Implementation:** Designed and implemented MySQL database structures, including tables, views, and stored procedures, to manage and streamline data for both applications.
- **Stored Procedures and Views:** Developed and optimized stored procedures and views to facilitate efficient data handling and retrieval, ensuring robust performance and data integrity.
- **Triggers:** Implemented triggers to automate business rules and maintain data consistency across the database.
- **Elasticsearch Integration:** Integrated Elasticsearch to enhance search capabilities, providing quick and relevant access to employee records and chat data.
- **Performance Optimization:** Conducted extensive performance tuning and optimization to address bottlenecks and improve the overall efficiency of the database systems.
- **Data Integrity and Security:** Ensured data integrity and security by following best practices for database management, including access control and adherence to security protocols.
- **Collaboration:** Collaborated closely with cross-functional teams to understand and implement database requirements, ensuring seamless integration of database updates with application functionalities.

Technologies Used:

- **Databases:** MySQL, SQL
- **Search Engines:** Elasticsearch

Jun 2023 -
Jul 2024

Software Engineer I

Mantra Technologies, HITEC City, Hyderabad

Gharpe.com, CRM.io, and Bub Applications

- **Project Overview:** Worked on Gharpe.com, a home buying platform; CRM.io, a B2B application for managing customer relationships and business sales; and Bub, an application for building and selling business solutions in a marketplace.
- **ORM and API Development:** Developed backend using FastAPI with ORM (SQLModel) to handle CRUD operations, authentication, token management, and user sign-up/login functionalities.
- **Authentication and Security:** Implemented robust authentication mechanisms, including token-based authentication, to ensure secure access and data integrity.
- **API Design and Integration:** Designed and developed comprehensive RESTful APIs for various functionalities, ensuring seamless communication between frontend and backend systems.

- **Data Modeling:** Created and maintained database models to accurately represent application data, facilitating efficient data management and retrieval.
- **Performance Optimization:** Conducted performance optimization to ensure fast and efficient API response times.
- **Collaboration:** Worked closely with the frontend development team to ensure smooth integration of backend services with the user interface.

Technologies Used:

- **Programming Languages:** Python (FastAPI)
- **Databases:** MySQL, MongoDB, SQL
- **Frameworks:** ORM, SQLAlchemy
- **Tools:** Elasticsearch, Token-based Authentication, Github, Postman

Education

Apr 2021 Bachelor of Technology: Mechanical Engineering

CMR Technical Campus - Hyderabad, India

Apr 2018 Diploma: Mechanical Engineering

Aurora Institute Of Technology - Hyderabad, India

May 2015 High School Diploma

Zilla Parishad High School - Kompally, Hyderabad

Accomplishments

Played a role as a backend/database developer in the successful development and deployment of critical projects. Took end-to-end responsibility for project execution, focusing on both backend and database aspects. Managed cross-functional teams to ensure seamless integration of backend services with database functionalities. Notable projects include HRSprout, Teams, Gharpe.com, CRM.io, Bub, and Stark.ai.
