An analyst with over 2.5 years of professional expertise enhancing cybersecurity through penetration testing, risk management, and threat mitigation. I specialize in identifying a spectrum of vulnerabilities and have expertise in cryptographic techniques, including post-quantum cryptography. [Certified Ethical Hacker \(CEH\)](#) from Purdue University, I am knowledgeable in frameworks like the Diamond Model of Intrusion Analysis and MITRE ATT&CK. I thrive in high-pressure environments, ensuring data accuracy and effective team management.

Education

- **National Institute of Technology**, Hamirpur 2023 - 2025
Masters of Technology in Computer Science & Engineering
- **Centre for Development of Advanced Computing**, Thiruvananthapuram 2022 - 2023
Post Graduate Diploma in Cyber Security & Forensics
- **Jadavpur University**, Kolkata 2016 - 2020
Bachelor of Engineering in Construction Engineering

Experience

- I. PricewaterhouseCoopers (PwC)**, Kolkata 05/2022 - 08/2023
Technology Consulting Associate
 - Conducted vulnerability assessment and penetration testing on over 60 web applications, web services, and mobile applications, utilizing manual and automated methods.
 - Utilized SQL injection, cross-site scripting, Cross-site request forgery, and other techniques to pinpoint and manipulate vulnerabilities in 30+ web applications including new findings in WebSocket technology.
 - Carried out security assessments on 3 applications on a single day, discovering 57 vulnerabilities.
 - Tools: Burp Suite, Nmap, SQLmap, AppSpider, Kali Linux, and 10+ other automated tools.
- II. Infosys**, Bangalore 01/2021 - 05/2022
System Engineer
 - Performed Cyber Threat Intelligence in a 24/7 environment, concurrently mitigating and managing over 230 new threats and risks for up to 5 clients.
 - Carried out threat analysis on 1800+ malicious threats, including IPs, emails, URLs, domains, software, APT groups, vulnerabilities, phishing campaigns, SOC, and firewall alerts.
 - Conducted threat intelligence monitoring analysis, encompassing brand monitoring for code repositories, credential leakage, dark web activity, non-mainstream alerts, & typo-squatting/domain squatting, effectively detecting over 30 threat actors.
 - Recognized with INSTA AWARDS from Infosys for being the best performer and a remarkable team player in the March Quarter.
 - Tools: ThreatConnect platform, Recorded Future & OSINT tools.

Research & Publication

- "Advanced Fingerprint Authentication System Integrating HQC and AES Encryption for Post-Quantum Security", (accepted) In: **9th International Conference on Computer Vision & Image Processing (ICCVIP)**, IIITDM, Chennai, December 19-21, 2024.

Projects

- Designed image steganography using the algorithm of Least Significant Bits.
- Engineered cryptographic techniques like DES, LWE, LUOV, BIKE, and HQC.
- Implemented a virtual Capture The Flag machine to simulate a web server with security vulnerabilities for participants to exploit and find hidden flags.
- Developed a secure login interface to deploy an authentication and authorization mechanism.

Skill Highlights

- **Languages:** C, C ++, Java, Python, HTML, CSS, JavaScript, ReactJS, MySQL, Qiskit.
- **Tools & Software:** Burp Suite, Nmap, AppSpider, Kali Linux, ThreatConnect, Recorded Future, Wireshark.
- **Technical Expertise:** Penetration Testing, Incident Response, Threat Intelligence, Threat Intel monitoring.
