Objective

Motivated AWS DevOps Engineer with 2+ years of experience, seeking to leverage expertise in CI/CD, Docker, and Kubernetes to drive operational efficiency and innovation. Dedicated to continuous improvement and collaboration, aiming to deliver scalable solutions and contribute to impactful projects within a forward-thinking organization.

Experience

- Mars Infosol Private Limited, Bangalore** 2022 - 2024
Devops Engineer
 - Managed CI/CD pipelines** using Jenkins, improving deployment speed by 25%.
 - Developed and maintained **Docker images** for various applications, ensuring consistency across environments.
 - Orchestrated containerized applications using **Kubernetes**, enhancing scalability and reliability.
 - Wrote and maintained **Bash scripts** to automate routine tasks, reducing manual effort by 30%.
 - Collaborated with development teams to implement and manage **Git** repositories, streamlining version control processes.
 - Monitored and maintained **Linux** servers, optimizing performance and ensuring security compliance.
 - Deployed and managed applications on **AWS**, utilizing services such as EC2, S3, and RDS.
 - Implemented infrastructure as code using **Ansible**, enabling consistent and repeatable environment setups.

Education

- Vishwesharray Technological University** 2019
Bachelor of Engineering

Skills

- Version Control: Git, GitHub
- Operating Systems: Linux (Ubuntu, CentOS, RedHat)
- Containerization: Docker
- Orchestration: Kubernetes
- CI/CD: Jenkins
- Scripting: Bash

Projects

- Automated Deployment Pipeline**
 - Objective:** Create an **automated CI/CD** pipeline for a web application.
 - Technologies Used:** AWS Cloud, Jenkins, Docker, Kubernetes, GitHub, Linux.
 - Description:** Designed and implemented a Jenkins pipeline that **automated the build, test, and deployment** processes using Docker and Kubernetes. This initiative **reduced deployment time by 50%** and **improved the consistency and reliability of releases**.

Real-Time Troubleshooting & Use Cases

- Deployment: Resolved **Kubernetes** issues, reducing downtime by 30%.
Optimization: Cut Jenkins build times by 40% through pipeline optimization.
