

DHILEEPAN A

Data Scientist | Machine Learning Engineer

✉ dhileepankala@gmail.com ☎ 8270547299 📍 Chennai 💻 <https://www.linkedin.com/in/dhileepankala23>

PROFILE:

Detail-oriented Data Scientist and Machine Learning Engineer with proven experience in developing innovative data solutions, optimizing machine learning models, and driving insights from large datasets. Skilled in Python, R, data visualization, and NLP, with a strong background in solving complex business problems. Passionate about leveraging data-driven approaches to contribute to impactful solutions

SKILLS:

Machine Learning

Pandas, NumPy, Scikit-learn,
Supervised & UN-supervised learning

Deep Learning

TensorFlow, Keras, PyTorch,
CNNs, RNNs, Transformers

Natural language processing

NLTK, Spacy, LLMs, Hugging
Face Transformers, LangChain

Data Visualisation

Matplotlib, Seaborn, Plotly,
Power bi

Statistical Analysis

Descriptive Statistics, Inferential
Statistics, Probability Theory

Technical Skills

Python, SQL, GEN-AI

PROFESSIONAL EXPERIENCE:

DATA SCIENTIST INTERN AT NULLCLASS

05/2024-07/2024 | Chennai

- ❖ Performed extensive data cleaning and feature engineering using PCA for dimensionality reduction, trained models including Random Forest and XG Boost, and evaluated performance through cross-validation and ROC-AOC analysis.
- ❖ Analyzed datasets with 1 million rows using statistical methods to uncover business insights, improving decision-making by 15%
- ❖ Developed a sentiment analysis tool that improved customer feedback response time by 25%

DATA SCIENTIST INTERN AT ZIDIO DEVELOPMENT

09/2024 – present | Bengaluru

- ❖ Collaborating with a team to develop machine learning models for projects and Analyzing large datasets using Python and R to extract meaningful insights.
- ❖ Implementing data cleaning and preprocessing techniques to improve model accuracy

PERSONAL PROJECTS:

- **Social Media Message Spam/Ham Classifier** : Developed a model to classify social media messages as spam or ham using machine learning techniques.
- **Sentiment Analysis Using VADER and Text Classification** : Implemented sentiment analysis leveraging VADER and text classification to gauge emotional tone in text.
- **Detection of skin disease using CNN and artificial intelligence** : Developed a CNN-based skin lesion detection model using Keras and Tensorflow, achieving 92% accuracy on a dataset of 10,000 dermoscopic images.

EDUCATION CREDENTIALS:

Bachelor of Technology – Information Technology

08/2019 – 06/2023 | Chennai

Jeppiaar Engineering College Grade: 79%

Sri valliammal school for knowledge and wisdom

Cuddalore

12th Grade HSC Grade: 70%

2018 – 2019

10th Grade SSLC Grade: 90%

2016 - 2017
