Software Engineer

To secure a challenging position in the software industry where I can effectively utilize my technical skills, while making a significant contribution to the success of the company and grow as a professional while being resourceful and innovative.

Education

B.E in Computer Engineering

Vidyalankar Institute of Technology
(University of Mumbai), Mumbai | August
2017 - October 2020

Diploma in Computer Engineering

Government Polytechnic Mumbai |
August 2014 - June 2017

Key Skills

- Docker
- Kubernetes
- Jenkins
- Terraform
- Helm Chart
- Ansible
- Primary knowledge on AWS Services - EC2, IAM, S3, EKS, AWS Beanstalk, ECS, AWS Fargate, lambda, SNS, CodeCommit
- Git, Github
- Github Actions, Gitlab CICD
- Operating System-Linux , Windows
- Language- Python, Java, Shell Script

Professional Experience

DevOps Engineer (Hands on Training)

Capgemini Engineering , (Flipkart Services) | June 2021 - June 2023

HANDS-ON TRAININGS

- Find out required dependencies & Configuration to dockerize application.
- Built and deployed Docker containers for implementation of Microservices.
- Deployed microservices using Kubernetes.
- Hands-on knowledge on devops tools such as Kubernetes, Docker, Terraform, Jenkins, Helm Chart, Ansible
- Worked on AWS cloud9, gremlin, terraform cloud, Hashicorp vault as part of AWS workshop.
- Hands-on knowledge of working with Gitlab CI/CD pipeline and created shared runners as a part of AWS workshop.

Certifications

Java-Track program Nalanda Training Program

| July 2021

DevOps tools through KodeKloud Platform

| June 2023

Projects

AWS Governance Project

Technology Used: EC2, S3, Lambda, IAM

This project uses lambda functions to optimize and manage AWS resources, enables you to ensure security , compliance, and cost-efficiency of your AWS Infrastructure.

Github Actions

Technology Used: python, Github Actions, EC2

Created Continuous Integration Workflow to build and test python project with Github Hosted Runners. Also executed the same project with self hosted runners.

Jenkins Pipeline project

Technology Used: EC2, Jenkins

- A simple jenkins pipeline to verify if the docker slave configuration is working as expected.
- Multi Stage Multi Agent Pipeline
- CI/CD Pipeline (Maven, SonarQube, ArgoCD, Jenkins, Helm and Kubernetes)
