## *python developer*

✉ abarnasura123@gmail.com ☎ +918148893982

📍 MS.Abarna,C/O k.Gajendran.AEE/TNEB/TED,N0:5, Ambedkar street, old perungalathur, Chennai-63.

### Profile

I have a 2 years experience of CH solution from chennai .

I am a python developer and the main work which I am currently doing in my organization is totally related to backend development.

I have a good knowlege of flask framework and database.

### Professional Experience

**CH Solution**  
*Software Engineering*

10/2021 - present  
Chennai, India

### Education

**MCA**  
*University College of Engineering, Anna University- Tiruchirappalli.*

06/2020 - 04/2022  
Trichy, india

**BCA**  
*H.H The Rajah's college*

06/2017 - 04/2020  
pudukkottai, India

### Skills

PYTHON

MYSQL

Flask Framework

Django

pandas

JS

HTML/CSS

### Languages

English • Tamil

## Roles and responsibilities

Writing and maintaining efficient, reusable, and reliable Python code. Identifying and fixing defects or bugs in the codebase. Collaborating with cross-functional teams to design, develop, and ship new features. Integrating data storage solutions and working with data pipelines. Participating in code and design reviews to ensure code quality and best practices are followed. Participating in the full software development life cycle, from design and development to testing and deployment. A Python developer plays a key role in the design, development, and maintenance of software applications and systems that are built using the Python programming language. They should have strong problem-solving skills and be able to work effectively as part of a team.

Father Name: Murugesan S  
Address: 5/2A, Othaipulikudiyiruppu,  
Keelappanaiyur(post)  
Thirumayam(tk)  
Pudukkottai(dic)  
pincode: 622 201.

## Projects

### AutoVerify

01/2023 - present

- Automating the Background Verification Process with Beautiful Soup, Selenium, and Flask short notes Automating the background verification process involves using various tools and technologies to gather and verify information about an individual's background. Beautiful Soup, Selenium, and Flask are three tools that can be used in this process. Beautiful Soup is a Python library that is used for web scraping. It parses HTML and XML documents and allows users to extract information from them. It is often used in web scraping projects to extract data from websites. Selenium is a web testing tool that can be used to automate tasks in a web browser. It allows users to automate tasks such as clicking buttons, filling out forms, and navigating web page.

### Web Scraping

10/2021 - 12/2022

This project was developed for the background verification team. This project uses a combination of tools and technique to scrap the web content and extract specific patterns from it. It uses beautiful soup and selenium to scrap content from the chrome browser. selenium is a tool that allows automate web browser that can be useful for scraping websites. regular expression is a tool for matching and extracting specific patterns of text the backend built with flask, to accept url as input.
