Summary

AI/ML Engineer with 2+ years of experience developing AI-driven applications using deep learning, and machine learning algorithms. Proficient in leveraging cloud-based services for scalable, production-ready solutions. Hands-on experience in optimizing machine learning models for mobile devices, contributing to the development of AI-based features in high-traffic applications.

Work Experience

Jul 2022 - Oct 2024

Associate Software Engineer, Samsung Electronics

- Developed a machine learning-based text classification system for the Samsung Health app using NLP techniques like TF-IDF and word embeddings, resulting in a 20% improvement in medication logging accuracy from scanned prescriptions.
- Optimized deep learning models for the GPS Outlier Detection feature on low-memory devices (smartwatches), reducing inference time by 25% through advanced hyper-parameter tuning techniques such as grid search and random search.
- Improved the compatibility of proprietary machine learning algorithms with low-memory devices like smartwatches by utilizing tools from the Python ecosystem, leading to a 30% reduction in algorithm load time while maintaining functionality.
- Facilitated focused instructional workshops on AI/ML tools and techniques, enhancing onboarding efficiency by reducing ramp-up time from eight weeks to six weeks, enabling developers to make meaningful contributions earlier.
- Played an integral role in developing and incorporating the "medication" feature into the Samsung Health app, thus catering to the global user base.
- Collaborated with the UI/UX team to enhance the 'medication' feature, resulting in a 13% boost in Samsung Health app usage.
- Coordinated the efforts of a digital health team to gather and analyze sensor data on the daily activities of more than 250 participants, achieving high-quality results with tracking accuracy exceeding industry standards at over 85%.

Intern, SheltOwn (Remote)

Nov 2020 - Dec 2020

- Created and executed user interface layouts for a front-end application using Adobe XD, improving the overall navigation experience and receiving positive feedback from over 20 users during beta testing sessions.

Education

Jul 2018 - Jul 2022

Vellore Institute of Technology, Vellore, Tamil Nadu

- Bachelor of Technology in Information Technology.

Skills and Certifications

- **AI & Machine Learning:** Deep Learning, Neural Networks, Logistic Regression, Decision Trees, Clustering Algorithms, TensorFlow, Scikit-learn, Pandas, Keras, Time series analysis, Statistics
- **Cloud services:** AWS
- **Data Visualization:** Tableau, Power BI, Data Munging, Data Normalization, Matplotlib, Jupyter, EDA
- **Programming:** Java, Python, SQL
- **DevOps:** Docker, Kubernetes, Git, Wireframing, CI/CD pipelines
- **Certifications:** AWS Certified Solutions Architect - Associate

Projects

News ETL data pipeline: *Pandas, SQLite, News API, Apache Airflow*

- Developed an ETL pipeline for news data using Apache Airflow and SQLite, gaining hands-on experience in data engineering and automation

Volunteer Experience

Nov 2022-Dec 2022

Research Fellow, Young Leaders for Active Citizenship(YLAC), Delhi

- Collaborated on the project 'Facilitating India's Renewable Energy Transition, assisting an MP in drafting a parliamentary policy recommendation to support the country's shift towards renewable energy
