

Behara Sai Bhargav

Software Engineer Testing

Phone: +91-8179434657

Email: bhargavaitam@gmail.com

Summary:

- Over 3.5 years of Total IT experience in **Quality Assurance** with Manual Testing and Automated Testing on Web-based applications.
- Exposure to all stages of SDLC (Software Development Life Cycle), Software Test Life Cycle (STLC), and software development methodologies such as Agile, Waterfall, and SCRUM.
- Experienced working in the **Health Care** domain.
- Experience in working with tools **Selenium** (Selenium Web Driver), **TestNG**, and **Eclipse**.
- Experience in **REST API** testing with **Postman**.
- Worked with Test Automation tools: **Apache**, **POI**, and **Selenium Web driver**.
- Worked with Automation Frameworks like **keyword-driven**, **Hybrid Driven** & **Data Driven** with experience in developing **Core Java** programming using **OOPS** concepts.
- **Cucumber** with Automation framework (**BDD**) for the Web application.
- Good Experience in using **GIT Hub**, and the Build management tool (**MAVEN**).
- Experience in working with Test Management/Bug Tracking tool **JIRA** to track test execution progress and prioritize bug fixes.
- Proficient in performing different kinds of testing like **Smoke**, **Sanity**, **Adhoc**, **Functional**, **GUI**, **Backend**, **Integration Testing**, **Regression Testing** & **UAT**.
- Good Experience in Web Service Testing (**SOAP & REST**) & **POSTMAN**.

EDUCATION:

- **Bachelor of Technology (B.Tech.) – Electrical Engineering** Jul 2016 - Apr 2019
Aditya Institute of Technology and Management, Tekkali.

TECHNICAL SKILLS:

Platforms	Windows, Mac.
Programming	HTML, XML, JAVA, Web services, JSON
Database	SQL
Bug Tracking	JIRA
Web/Technologies	HTML, XML, CSS, Xpath, Firebug, Java, GitHub, Jenkins (CI/CD)
Tool	Selenium WebDriver, Test-NG, Selenium IDE, API Postman
Browsers	Mozilla Firefox, Chrome.
Build Tool	Maven.

PROFESSIONAL EXPERIENCE:

- **Appistoki Consulting Services Pvt. Ltd., Bangalore** as a **Software Engineer Testing** from March 2022 to April 2023.
- **Smartried Software Technologies Pvt. Ltd., Bangalore** as a **Test Engineer** from Dec 2019 to Jan 2022.

Project #3: BEDROCK

March 2022 – April 2023

Client: CERNER

Role: Software Engineer Testing

Tool: Selenium WebDriver, Eclipse, Jira, GIT Hub, RQM.

Description:

The Cerner Bedrock system is an innovative system of wizards that allows users to design, build, and maintain Cerner Millennium at health care systems. Bedrock also allows tailoring the reference data providing the ability to add, modify, and remove data items as necessary.

Roles & Responsibilities:

- Used Selenium, and Jenkins for parameterization. Selenium with Automation for the Web application.
- Selenium automation to different types of browsers to perform Cross Browser Testing.
- Involved in Release and Sprint planning and effort estimation of testing activities.
- Managing incidents and problems related to the services offered.
- Participate in weekly test planning, project status meetings, and reviews.
- Collaborating with senior leaders.
- Attended Demos and Meet with Developers for the Defect/EPIC.
- Creating, Enhancing, Debugging, and Running Test Cases.
- For every release create a Test Planning in RQM and add all the release defects. Create the execution records. Run and attach the evidence. (The evidence should be attached as soon as regression is completed).
- Proactively learning about new technologies.

Project #2: EPConnect2

June 2020 – January 2022

Client: MERCK

Role: Test Engineer

Tool: Selenium WebDriver, Eclipse, Jira, GIT Hub, Maven, Post-Man, SQL.

Description:

EasyPod Connect is a medical domain project. Doctors use this software to track the patient's dosage details and the patient's adherence level. EasyPod Connect online system for monitoring Human Growth Hormone Treatment (HGHT) adherence and outcomes for patients using the EasyPod medical device. This Software allows you to connect a personal computer to your patient's EasyPod medical device and to download the injection history stored in your patient's EasyPod medical device.

Roles & Responsibilities:

- Used TestNG Parameter, TestNG.xml, and Data Provider (Method and ITest Context.) for parameterization. Cucumber with Automation framework (BDD) for the Web application.
- Used MAVEN to build and run the Automation framework.
- Selenium automation (TestNG) to different types of browsers to perform Cross Browser Testing.
- Performed Black Box Testing, and UAT Testing and extensively used Selenium for Regression, Smoke, Functional Testing, and data-driven testing using Excel files in Selenium.
- Performed functional, regression and UAT Testing extensively using the Selenium Web driver.
- Used JAVA for the implementation of script on Eclipse. TestNG annotations are used for the implementation.
- Involved in Release and Sprint planning and effort estimation of testing activities.
- Participate in weekly project status meetings.
- Involved in functional, system, smoke, and regression testing.

Project #1: EPConnect2

Dec 2019–June 2020

Client: MERCK

Role: Associate

Tool: Postman, Manual testing, Eclipse

Description:

EasyPod Connect is a medical domain project. Doctors use this software to track the patient's dosage details and the patient's adherence level. EasyPod Connect online system for monitoring Human Growth Hormone Treatment (HGHT) adherence and outcomes for patients using the EasyPod medical device. This Software allows you to connect a personal computer to your patient's EasyPod medical device and to download the injection history stored in your patient's EasyPod medical device.

Roles & Responsibilities:

- Involved in Release and Sprint planning and effort estimation of testing activities.
- Participate in weekly project status meetings.
- Involved in functional, system, smoke, and regression testing.
- Debugging and testing code.
- Documenting and testing new software applications.
- Researching, investigating, and fixing a wide range of technical issues.
- Collaborating with senior leaders.
- Approaching problems and creating solutions.
- Proactively learning about new technologies.
