WORK EXPERIENCE

2.4 Years

FICUSTEXAS Technologies PVT LTD

September 2022 - current / Bangalore

P1: CQA, Client: Altisource DevOps Engineer

- Created and implemented new DevOps pipelines to deliver Infrastructure as Code using DSL **Groovy** in **Jenkins**, **Docker**.
- Built Docker images for different environments such as Dev, QA, Staging and Production.
- Worked on in **GITHUB** to manage source code, **Maven** to automate War Package Build and SonarQube to static code analysis.
- Developed **Ansible** playbooks and automated the execution of routine **Kubernetes** deployment scripts.
- Provisioned resources in AWS such as VPC, EC2, S3, EBS, SECURITY GROUP, IAM, CLOUD WATCH, AUTOSCALING AND ELB using **Terraform**.
- Implemented process for release management, automated code deployment, configuration management and monitoring.
- Helped customers shape their journey to adopting the Cloud and DevOps, providing customers with technical and strategic support on their "cloud journey".
- Worked on Defect analyzing and Reporting in **JIRA**

P2: HUBZU, Client: Altisource Build Engineer

August 2021 - August 2022 / Bangalore

- Installed and configure Jenkins master and slave nodes. Built **CI/CD** pipeline to deploy the application to **Tomcat** Application server.
- Configured **Chef** Server, workstation, client and wrote Recipes to create a deployment into EC2 instances.
- Performed source code management with **SVN** such as versioning, branching, merging and build with **ANT**.
- Installed, configured and Managed Monitoring tools such as **Nagios** for Resource/Network Monitoring.
- Developed shell scripts to day to day activities and tasks for automating. Performed Linux administrative tasks in **RHEL**, **UBUNTU** and **CENTOSE**.
