ACADEMIC DETAILS

Bachelor of Technology, SASTRA Deemed to be University
Major: Information Technology

2016 - 2020

SKILLS

Technical Skills	GIT, Azure DevOps, Terraform, Ansible, Docker, Kubernetes, SonarQube, Jenkins, Actions
Cloud	Azure, AWS
Scripting	Yaml, PowerShell, Python

WORK EXPERIENCE

DevOps Engineer Capgemini Technology Services India Ltd	Mar 2021 - Present <i>Bengaluru, KA</i>
---	--

- Creation of CICD Pipelines in Azure DevOps for .NET web and batch applications using classic and Yaml
- Utilized Terraform scripting to successfully create and manage Azure infrastructure on the Azure platform.
- Enhanced the existing CICD process and reduced the pipeline execution time by 20 percent.
- Collaborated with architects and leadership for implementing code quality checks and security measures.
- Responsible for handling production deployments and postproduction checks to ensure functionality of applications.

PROJECTS

PowerShell Scripting:

Developed a PowerShell script that performs REST APIs to fetch the commit history of Azure GIT repositories. PowerShell scripting to segregate fetched data for different business areas and populate it into an excel file.

Azure Data Bricks Deployment Using Pipeline:

Continuous deployment of python notebooks using the CICD pipeline in azure DevOps and performed code quality analysis using SonarQube and assigned proper quality gates.

Azure Resources Creation Using Terraform:

Terraform scripting to create resources like static web app, function app, key-vault, and virtual machines. Importing existing resources in terraform state file which is stored in the azure storage account container.

AWS CICD Pipeline:

Build a CICD pipeline for ASP WEB application using AWS Code Commit, Code Build, Code Deploy, Code Pipeline and AWS Elastic Bean Stalk

Networking and Infrastructure Configuration:

Monitored the resources health using Nagios and prepared complementary reports.
Implemented the configurations using Ansible playbooks and controlled as per business needs.

ACHIEVEMENTS

- 2023: Professional Scrum Master I certified
- 2023: 889/1000, Azure 900 Certified (AZ-900)
- 2023: Agile Software Development
- 2022: 803/1000, AWS Certified Cloud Practitioner (CCP)
