Education

KPR Institute of Engineering and Technology

Bachelor of Engineering

Aug 2019 – Apr 2023

Coimbatore, Tamilnadu

Experience

Genpact India Private Limited

Data Analyst

Jul 2024 – Present

Chennai, Tamilnadu

- Worked for the Operations (Manufacturing and Analytics) business unit, collecting, filtering, cleaning client data with Microsoft Excel and other tools to guarantee correctness before entering it into in-house design engineering software.
- Analyzed data in QGIS for foot patrol and vehicle operations, using sophisticated Excel procedures for verification.
- Created Power BI assignments for design engineers, and used O-Calc Pro to create 3D structural design reports.
- Evaluated big datasets for quality, fixing data problems with Helix and working with developers to improve data consistency.

Gravitech Solutions Private Limited

Project Engineer

May 2023 – Nov 2023

Chennai, Tamilnadu

- Developed customized automation programs using various PLC software, ensuring seamless system integration.
- Streamlined project processes by efficiently preparing Bills of Materials (BOM) and optimizing procurement strategies.
- Collaborated with cross-functional teams to foster innovation and ensure successful project outcomes

Projects

Cybersecurity Threat Detection System | *Python, Data Analysis, Data Visualization, Machine Learning*

Sep 2024

- Developed a Python-based system to monitor network traffic and detect anomalies or potential cyber threats using machine learning.
- Preprocessed and normalized network traffic data to effectively identify intrusions and anomalies.
- Built a Random Forest model, achieving over accuracy in anomaly detection.
- Created a dashboard using Dash/Plotly for real-time insights into network threats.
- Implemented an alert mechanism to notify administrators about potential threats, enhancing overall network security.

Sentiment Analysis | *Python, Data Analysis, Data Visualization*

May 2024

- Developed a sentiment analysis model to categorize IMDB reviews as positive or negative using machine learning.
- Conducted extensive data preprocessing, including data cleaning, tokenization, stemming, and TF-IDF vectorization to prepare the text data for analysis.
- Trained and validated a Naive Bayes classifier, achieving high accuracy, enhancing overall network security.

Remote Work Management Tool | *Python, Django, HTML/CSS, SQL*

Jan 2024

- Developed a Django-based web app for managing remote teams, with task tracking, project dashboards, and time logging.
- Integrated real-time chat, file sharing, and role-based access for secure collaboration.
- Implemented reporting features and deployed using Docker for scalability.

Technical Skills

Languages: Python, HTML/CSS, SQL

Developer Tools: VS Code, Pycharm, Jupyter Notebook

Technologies/Frameworks: GitHub, Django, Data Analysis, Data Visualization, Data Science, Machine Learning

Certification

- Data Science.
- Problem Solving.
- Python.
