Skills

C | C++ | python(Basic) | HTML | CSS | JavaScript | NodeJS | Unix | SQL | MongoDB | MySQL

Area of interest

Data Structures and Algorithms | Object-Oriented Programming and Concepts | Operating System | Database Management System •| Web Development | Machine learning

Projects

• ShPortal

March - July 2023

NITT ShPortal is an innovative online platform tailored for National Institute of Technology, Trichy (NITT) students, offering crucial support in their placement and academic journeys. Like seniors can upload their experience and study material on it. The platform includes a book store for affordable textbook transactions, promoting sustainability. Additionally, students can access curated academic notes to boost their learning. With webmail verification ensuring exclusivity, NITT ShPortal is a comprehensive resource that empowers students for successful placements and academic growth.

Technology used-HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB

• Credit Card Fraud Detection system

Jan2023 - May 2023

Developed a system that uses Decision Trees, SVM, and Logistic Regression to detect credit card fraud. An Artificial Neural Network (ANN) with precise tuning techniques was also used to increase accuracy.
