Career Objective

I am currently in my final year of Engineering, specializing in Information Science with a focus on AI and Robotics. With strong communication, organizational, and teamwork skills, I am eager to take on challenges as a Test Engineer, learn from practical experiences, and contribute to innovative projects.

Education

- Presidency University** 2021-2025
Btech information science and engineering (Ai and Robotics)
8.03 cgpa
- St.Philomena's Pu College** 2019-2021
12th Science PCMB
88%
- Air Force School Jalahalli East** 2009-2019
10th
76.80%

Certifications

- Career Essentials in Generative AI issued by Microsoft and LinkedIn.
- Agile scrum in practices issued by Infosys
- Programming Basics issued by Great Learning Academy.
- Open AI pre trained transformer for developers issued by Infosys

Projects

- Latest News Robot**
To create a UiPath robot that fetches the latest news using web scraping, you can use the Data Scraping tool to extract news articles from a website like Google News. This automation allows you to receive the latest news updates directly in your inbox.
- Auto Image Captioning Application**
This project uses deep learning models from Hugging Face to convert images into text. LayoutLM can extract text from images containing printed or handwritten content. For image captioning, models like BLIP generate descriptive text based on the content of the image.
- Automatic content generator**
Automatic content generation using UiPath involves using robotic process automation (RPA) to create, manage, and distribute content with minimal human intervention. This can include generating reports, articles, or emails by extracting data from various sources, processing it, and organizing it into structured formats
- Smart Irrigation System**
Developed a smart irrigation system using Arduino and Embedded C, reducing water usage by 30% and enhancing irrigation efficiency."
- News app**
Implemented RESTful API integration for fetching real-time news data using JavaScript and React.js, improving data retrieval efficiency and providing users with up-to-date news from multiple sources.

Internships

- Software Development Intern

Prodigy InfoTech– Aug 2024 to Sept 2024

Enhanced my Java skills by building programs like Temperature Converter, Guessing Game, and Contact Management System. Also developed algorithmic thinking with a Sudoku Solver and gained experience in WebScraping.

Technical Skills

- Robotic Process Automation
- Matlab
- Programming Basics
- Computer Networks
- Microsoft excel
- Microsoft PowerPoint

Soft Skill

- Communication
- Time management
- Conflict Resolution
- Team collaboration
- Work Ethic
- Leadership

Languages

- English
- Hindi
- Kannada
