GOWTHAM M S

Data Engineer

Azure Data Engineer with 3 years of expertise in designing and implementing ETL pipelines using SQL, Azure Data Factory, Databricks, and Data Lake. Proficient in building end-to-end Azure pipelines with Azure DevOps and GitHub, recognized for delivering high-quality outputs and making significant contributions.

Technical Skills

- **Big Data Processing:** Apache Spark, Hadoop, Apache Kafka
- **Cloud Platforms:** Azure Data Factory, Azure Databricks, Azure Synapse Analytics, Azure Stream Analytics, Microsoft Fabric
- **Databases:** MySQL (relational), Cassandra (NoSQL)
- **Programming Languages:** Python, Java
- **Version Control:** GIT, Azure DevOps, SVN

Certifications

- Microsoft Certified **Azure Data Engineer Associate (DP-203)**
- Microsoft Azure Fundamentals (**AZ-900, DP-900, AI-900**)
- Infosys Certified Apache Cassandra Developer
- Infosys Certified Apache Kafka Developer
- Infosys Certified MySQL Associate

Education

B.E in Bio-Medical Engineering
Sethu Institute of Technology
Anna University, Tamil Nadu.

Achievements & Awards

- Secured recognition through the '**Insta Award**' due to outstanding work in delivering five essential projects before deadlines.
- Enhanced client interaction metrics and exceeded original performance targets by a substantial 15%.

Work Experience

Senior Systems Engineer - *Infosys Limited*

Jan 2024- Present

Responsibilities:

- Developed a high-performance ETL pipeline using MySQL, Spring Batch, and Jasper Reports, which is processing **5GB** of data per day with a **100%** accuracy rate.
- Designed and optimized SQL stored procedures that increased query performance by **60% on batch jobs** handling JSON source data; **achieved an average runtime reduction of three hours per day** for repetitive processes.
- Collaborated with cross-functional team of **8** members to implement a new data quality framework for the batch processing application, resulting in a **20%** reduction in data errors and a **15%** increase in data integrity.
- **Leveraged Jira** as a defect tracking and resolution tool, collaborating closely with test leads to prioritize and address issues based on severity, **resolved 30% of defects** ahead of schedule.

Systems Engineer - *Infosys Limited*

Dec 2021- Dec 2023

Responsibilities:

- Spearheaded the **transformation of end-to-end business requirements** through rigorous analysis and documentation, resulting in a **30% increase in project accuracy** and enhanced stakeholder engagement.
- Managed a team of **8** individuals, including analysts, Java developers, and BI experts, to achieve project goals with **95%** customer satisfaction.
- **Reduced defects by 30%** through careful analysis of change requests, ensuring timely and accurate implementation of new features.
- Revamped Jasper Reports by creating visually compelling templates that transformed data presentation; **received positive feedback from 95% of users**, improving engagement and comprehension of critical business insights.

Projects

- **Azure Streaming Project:** Developed Confluent Kafka Streaming solution using Confluent Cluster with Realtime PowerBI Dashboard which can handle 10 thousand records per minute using Microsoft Fabric technology, Azure Data Lake solution and Azure Databricks.
- **ETL on Azure Data Bricks:** Designed a scalable ETL pipeline using Factory Pattern to handle various data formats and processed large datasets 50% faster using Pyspark on Azure Data Bricks.
- **Event Hubs Streaming Project:** Implemented a comprehensive streaming solution to increase the data retrieval speed by 50% with Azure Event Hubs, Azure Databricks, Azure Data Lake.
- **Azure Dynamic Data Factory:** Deployed a scalable data pipeline solutions in various environments using Azure Data Factory and by using Azure DevOps CI/CD the deployment speed increased by 25%.
