Summary

Highly motivated and detail-oriented automation testing professional with 4.5 years of experience in testing and 2 years of relevant experience in automation testing. Skilled in automating web application testing using Selenium WebDriver with Cucumber framework. Proficient in TestNg framework, API testing using POSTMAN, SoapUI, and Karate framework. Strong understanding of SDLC and STLC life cycles.

Technical Skills

Automation testing using Selenium WebDriver with Cucumber framework - TestNg framework - API testing using POSTMAN, SoapUI, Rest assured and Karate framework - Basic programming language - Java - SQL queries - Mobile testing - Appium - Bug management tools: JIRA, RTC - Agile/scrum development processes - CI/CD pipelines: Jenkins, GitLab CI/CD - Performance Testing: Jmeter - Accessibility Testing: NVDA, Axe dev

Professional Summary

IT People Corp (PNC) (Nov 2023 - Sep 2024)

Client - IBM

Worked on modules like CFI (Cash Flow Interface) and VWT (Virtual Wallet Tools)

- CFI: Business Payments, Pay and Receive Sync, Pay and Get paid

- VWT: Calendar, Money bar, Spending and Budget, Saving Rules

Used Selenium and Cucumber framework for automation testing

Performed API automation testing using Postman and Karate tool

Worked on Accessibility testing using NVDA, Axe dev, WCAG 21

Experis IT (Enovia) (Jun 2021 - Mar 2023)

Client - Ibm

Worked on Enovia, a web-based PLM application

Modules worked on: Part management, Release ECO, Clone ECO, BOM management, Material Compliance, Batteries

Part Number search options: single edit and group edit scenarios

Collaborated with development and product teams to define test objectives

Developed and maintained automated test scripts using industry-leading tool

Used Selenium with Testng in Hybrid framework for automation testing

Used Appium for mobile automation testing

IDC - (Sep 2019 - Apr 2020)

Worked on Fintech applications and performed testing with organization applications, including:

- HR operations
- Leave management system
- Timesheet creation app
- Incident management

Performed various types of testing for the applications, including: Functional testing, Regression testing, Performance testing

Megsun (CLAPS) (May 2018 - Jul 2019)

Client- CCSL

Worked on Canara Loan Application Processing System (CLAPS) project

Performed manual testing to ensure the web application met expectations

Ensured defects were carried over to the UAT phase
Assisted in test planning activities, including: Test case design, Test scenario creation, Test data preparation
Documented test artifacts, including: Test plans, Test cases, Test execution reports

Education

Course / Degree	School / University	Grade / Score	Year
MCA	RNSIT / VTU	60	2017
BCA	ARJ / RCUB	72	2014

Certifications

Completed Java training in Cluster tutorial, Bengaluru.
Completed 6 months of Internship in Neo Rays company.
